Rescaling Sustainability Transitions Maija Halonen, Moritz Albrecht, Irene Kuhmonen, 2024-10-28 This Open Access book explores sustainability transitions with a focus on their influence on the relationships between cores and peripheries the rural and the urban and the large and the small scale The societal changes induced by sustainability transitions are expected to assemble as a variegated and heterogeneous process reproduced by different spatial contexts and scales Hence the practical solutions and impacts of processes framed as sustainability transitions are expected to vary between different localities in terms of their natural material or human resources the heritage of the development their power and market relations virtual and physical connections as well as shifting individual rationalities within and across certain socio economic spaces To highlight these socio spatial processes their alignments frictions and contradictions for sustainability transitions this book and its contributions call for an increased engagement in the scalar aspects of sustainability transitions and their governance The authors argue that rescaling follows from two observations on the extant literature concerning sustainability transitions Firstly there is a call for a stronger engagement of sustainability transitions research with questions of place and relocalization practices their embedded power relations but also questions on small scale trajectories for the territorial and economic materializations in terms of production and market

reach as an alternative to the large scale dominance of resource exploitation and use Secondly there is a call for increased attention to the relational processes and ontological framing that reproduce mobilities and scalar shifts in governance arrangements

Abandoned Anne Kim, 2020-02-11 Winner of the 2020 Goddard Riverside Stephan Russo Book Prize for Social Justice A deeply affecting expos of America s hidden crisis of disconnected youth in the tradition of Matthew Desmond and Adrian Nicole LeBlanc For the majority of young adults today the transition to independence is a time of excitement and possibility But 4 5 million young people or a stunning 11 5 percent of youth aged sixteen to twenty four experience entry into adulthood as abrupt abandonment a time of disconnection from

school work and family For this growing population of Americans which includes kids aging out of foster care and those entangled with the justice system life screeches to a halt when adulthood arrives Abandoned is the first ever exploration of this tale of dead ends and broken dreams Author Anne Kim skillfully weaves heart rending stories of young people navigating early adulthood alone in communities where poverty is endemic and opportunities almost nonexistent She then describes a growing awareness including new research from the field of adolescent brain science that emerging adulthood is just as crucial a developmental period as early childhood and she profiles an array of unheralded programs that provide young people with the supports they need to achieve self sufficiency A major work of deeply reported narrative nonfiction Abandoned joins the small shelf of books that change the way we see our society and point to a different path forward
