Programming Languages and Systems Wei-Ngan Chin, 2004-10-19
On behalf of the organizing committee I would like to welcome you all to the second Asian Symposium on Programming Languages and Systems APLAS 2004 held in Taipei on November 4-6, 2004. Since the year 2000, researchers in the area of programming languages and systems have been meeting annually in Asia to present their most recent research results, thus contributing to the advancement of this research area. The last four meetings were held in Singapore (2000), Daejeon (2001), Shanghai (2002), and Beijing (2003). These meetings were very fruitful and provided an excellent venue for the exchange of research findings and experiences in programming languages and systems. APLAS 2004 is the fifth such meeting and the second one in symposium setting. The first symposium was held in Beijing last year. The success of the APLAS series is the collective result of many people's contributions. For APLAS 2004, I would like to thank all the members of the Program Committee, in particular the Program Chair, Wei-Ngan Chin, for their hard work in putting together an excellent program. I am most grateful to invited speakers Joxan Jarar Franck Pfenning and Martin Odersky, who have traveled a long way to deliver their speeches at APLAS 2004. I would like to thank all the referees who helped review the manuscripts, the authors who contributed to the proceedings of APLAS 2004, the members of the Organizing Committee who made considerable effort to organize this event, and all the participants present at this meeting. Without your support, this symposium would not have been possible. Finally, I would like to acknowledge the support of the Asian Association for Foundation of Software and Academia Sinica, Taiwan.
Advanced Calculus Thomas P. Dence, Joseph B. Dence, 2009-12-02
Advanced Calculus explores the theory of calculus and highlights the connections between calculus and real analysis, providing a mathematically sophisticated introduction to functional analytical concepts. The text is interesting to read and includes many illustrative worked-out examples and instructive exercises, and precise historical notes to aid in further exploration of calculus. It covers exponential function and the development of trigonometric functions from the integral. The text is designed for a one-semester advanced calculus course for advanced undergraduates or graduate students. Appropriate rigor for a one-semester advanced calculus course. Presents modern materials and nontraditional ways of stating and proving some results. Includes precise historical notes throughout the book. Outstanding feature is the collection of exercises in each chapter. Provides coverage of exponential function and the development of trigonometric functions from the
