

2. What is Cloud:

When being used in the context of cloud computing, the term "cloud" refers to the Internet. The cloud is a metaphor for technology that is abstracted so that the user does not have to know the underlying infrastructure. The cloud is a collection of servers and other computing resources that are accessible over the Internet. The cloud is a shared resource that can be used by multiple users. The cloud is a virtual environment that can be used to run applications and services. The cloud is a scalable environment that can grow or shrink as needed. The cloud is a secure environment that can protect data and applications. The cloud is a cost-effective environment that can reduce the cost of IT. The cloud is a flexible environment that can be used in a variety of ways. The cloud is a powerful environment that can enable new applications and services. The cloud is a transformative environment that is changing the way we live and work.
