Worker Cooperatives in India Timothy Kerswell, Surendra Pratap, 2018-07-09 This book discusses the experiences of cooperative enterprises in India that have been operated by or influenced to a significant extent by trade unions. It describes the origins of these movements in India, presenting a political strategic view of their development and in some cases their decline. The book also presents case studies of groundbreaking social experiments conducted in India in which trade unions have formed cooperatives for production and service provision for the working class movement. It also offers lessons learned from previous social experiments and explains how to use them for future strategies in the working class movement by using primary research undertaken on trade union cooperatives in India. With globalization often given as a reason for the decline of trade unions and transformative social movements, this book demonstrates that where movements declined it was due to their own internal weaknesses, while presenting successful case studies of movements which have shown resilience in the face of globalization. The book also gives an extensive criticism of India's Self Employed Women's Association as a model of a depoliticized trade union cooperative. The main lesson of this book is that cooperatives represent a viable strategy to build working class power in the 21st century in India and elsewhere. Global Histories of Work Andreas Eckert, 2016-09-12 *Global Histories of Work* is the first title in the new series *Work in Global and Historical Perspective*. This collection of selected articles written by leading scholars in different disciplines provides both an introduction and numerous insights into themes, debates, and methods of Global Labour History as they have been developed over the last years. The contributions to the volume discuss crucial historiographical developments, present different professions that have gained new attention in the context of an emerging Global Labour History, critically engage the boundaries of free labour and the ambiguities contained in this concept, and take up and historicize current debates about informal labour. *Global Histories of Work* will familiarize readers with a burgeoning field of high academic social and political relevance.

Neoliberalism and the Transforming Left in India Ritanjan Das, 2017-10-30 West Bengal has often been perceived as somewhat of an aberration in the wider context of a rather chaotic Indian democracy as the Left Front spearheaded by the Communist Party of India Marxist (CPIM) demonstrated a rare instance of political stability, decisively winning seven consecutive democratic elections from 1977 to 2006. Its development record has also been substantial, with a focus on land reforms, the panchayati raj institution, and an agriculture-centric development agenda. This book presents a reappraisal of the political economic history of the CPIM Left Front regime against the backdrop of the Indian reform experience. It examines two distinct areas: the conditions that necessitated the regime to engineer a transition from an erstwhile agricultural-based growth model to a more pro-market economic agenda post 1991, and the political strategy employed to manage such a transition, attract private capital, and at the same time sustain the regime's traditional rhetoric and partisan character. In order to develop a more textured understanding of the recent political

developments in West Bengal the author applies a historically nuanced and inductive political economic analysis which draws on published materials and primary material such as government documents and interviews with bureaucrats political activists members of the intelligentsia and ministers A valuable contribution to the ongoing debate in the literature on the drifts underway with the Indian Left and India s economic transformation post 1990s this book will be of interest to academics in the field of Political Science Government Political Economy and South Asian Studies
