High Value Fermentation Products, Volume 1 Saurabh Saran, Vikash Babu, Asha Chaubey, 2019-03-12 Green technologies are no longer the future of science but the present. With more and more mature industries such as the process industries making large strides seemingly every single day and more consumers demanding products created from green technologies it is essential for any business in any industry to be familiar with the latest processes and technologies. It is all part of a global effort to go greener and this is nowhere more apparent than in fermentation technology. This book describes relevant aspects of industrial scale fermentation an expanding area of activity which already generates commercial values of over one third of a trillion US dollars annually and which will most likely radically change the way we produce chemicals in the long term future. From biofuels and bulk amino acids to monoclonal antibodies and stem cells they all rely on mass suspension cultivation of cells in stirred bioreactors which is the most widely used and versatile way to produce. Today a wide array of cells can be cultivated in this way and for most of them genetic engineering tools are also available. Examples of products operating procedures engineering and design aspects economic drivers and cost and regulatory issues are addressed. In addition there will be a discussion of how we got to where we are today and of the real world in industrial fermentation. This chapter is exclusively dedicated to large scale production used in industrial settings.

Extracting Bioactive Compounds for Food Products M. Angela A. Meireles, 2008-12-16 The demand for functional foods and nutraceuticals is on the rise leaving product development companies racing to improve bioactive compound extraction methods a key component of functional foods and nutraceuticals development. From established processes such as steam distillation to emerging techniques like supercritical fluid technology.

Natural Product Extraction Juliana M Prado, Mauricio A Rostagno, 2022-07-20 Natural products are used by the food pharmaceutical and cosmetics industries and extraction technologies and potential applications for plant extracts are of interest to many industrial sectors. Extraction of natural products in an economic and environmentally friendly way is of high importance to all industries involved. The second edition of this book presents an updated holistic in depth view of the more environmentally benign techniques available for the extraction of natural products along with their newest applications and case studies. Conventional and emerging extraction techniques are discussed in detail. New topics include enzymes pulsed electric energy and on line in line analysis. Written for academics and industrialists working in both natural product extraction and green chemistry this new edition provides a valuable update on current trends in the field.

Handbook of Natural Bioactive Compounds Rakesh K. Sindhu, Sumitra Singh, Dinesh Kumar, 2026-03-02 Natural bioactive compounds have a wide range of therapeutic potential. They are the basis for many life saving drugs and have the potential to treat and manage a variety of diseases. Handbook of Natural Bioactive Compounds provides a broad overview of techniques for the extraction isolation and identification of bioactive compounds from natural sources such as plants marine organisms and microorganisms.
