**Part One:** The rationale for the significance of other chord successions, in addition to circle progressions,

**I**n the early edition of *Music in Theory and Practice*, authors Bruce Benneville and Henry Stone (now both "at large") wrote from the beginning of the chapter on the analysis of the common-practice system a pre-announcement of circle progressions:<sup>1</sup> "One often notices a certain order about the 'tonal motions' . . . in which circle progressions are readily identified. Later chapters on chords and chord motion and voice-leading techniques that are used to link these chordal and harmonic progressions are accompanied by descriptions both of ascending fourths and circle motions and can also be viewed as results of procedures concerning four-note movement. Progressions and 'tonal progressions' are usually seen as circle progressions resulting in strong directional motion. The feeling created in the reader often is characteristic of moving through the tonal circle progressions as one is studying it now."<sup>2</sup>

However, as Bennett and Stone affirm, the concept of movement beyond progressions other than circle motions, particularly chord motions other than circle motions, has been recognized and emphasized by others long after the early editions and has persisted to the present. Specifically, the two authors in *Music in Theory and Practice* did not ignore all other movements or other relationships. "Backgrounds,"<sup>3</sup> voice-leading techniques, diminished-seventh and non-progressive triads, chromatic progressions, and the strongest system of tonalistic movement for contemporary chord relationships, specifically, chromatic third relations (Major, minor, and augmented triads) and so on.

Moreover, as Bennett and Stone progressions (chromatic, ascending and falling) are not "circular" (i.e., circle progressions) and do not fit an adequate logic of describing motion in the sense of the chapters on tonality, particularly movement. But it is possible that they do have other functions. Later, Bennett published his monograph *Chromatics*, in which
