Buddha Nature and Animality ,2007 Buddha Nature and Animality is about peaceful living In discussions about the relation between humans and their animal relatives a central theme is that Buddhism represents the most viable philosophical religious alternative to the malaise surrounding us when we confront ecological problems This recognition points to the notion of compassion Karuna is given expression as an alternative to stewardship since stewardship too falls into the dualistic trap of privileging the human Authors seek beyond the limits imposed by discourses of ethics and assume a more radical approach to seek the roots of the perspectives that allow the conceptual space for the problematic dialogues in the first place Rather than viewing animals as distinct beings sharing our environs authors attempt to give the animal soul back to spirituality They argue for the naturally enlightened spontaneity arising in animal nature and that animal nature is Buddha nature This animal buddha nature is fundamental to understanding Buddhism as a 21st century philosophy for living and dying

Back to the Future of the Body Dominic Janes,2007 What can the past tell us about the future s of the body The origins of this collection of papers lie in the work of the Birkbeck Institute for the Humanities which has been involved in presenting a series of international workshops and conferences on the theme of the cultural life of the body The rationale for these events was that in concepts as diverse as the cyborg the questioning of mind body dualism the contemporary image of the suicide bomber and the patenting of human genes we can identify ways in which the future of the human body is at stake This volume represents an attempt not so much to speculate about what might happen but to develop strategies for bodily empowerment so as to get oeback to the future of the body The body it is contended is not to be thought of as an oobject or

a design but as an active participant in the shaping of cultural formations And this is emphatically not an exercise in digging corpses out of the historical archive The question is rather what can past lived and thought experiences of the body tell us about what the body can become The continuing vitality of debate around the body was proven by the range and depth of the papers presented at the workshop on which this volume is based does the body have a future TM Our overall theme required contributors to think through embodiment in the past This they did with considerable interdisciplinary vigour rigorousness and imagination Prof Donna Dickenson Director Birkbeck Institute of the Humanities The Theosophist ,1924 *Bibliographic Guide to Psychology* New York Public Library.
