**Photophysics and Nanophysics in Therapeutics** Nilesh M. Mahajan, Avneet Saini, Nishikant A. Raut, Sanjay J. Dhoble, 2022-04-29 Photophysics and Nanophysics in Therapeutics explores the latest advances and applications of phototherapy and nanotherapy covering the application of light radiation and nanotechnology in therapeutics along with the fundamental principles of physics in these areas Consisting of two parts the book first features a range of chapters covering phototherapeutics from the fundamentals of photodynamic therapy PDT to applications such as cancer treatment and advances in radiotherapy applied physics in cancer radiotherapy treatment and the role of carbon ion beam therapy Other sections cover nanotherapeutics potential applications and challenges and nanotherapy for drug delivery to the brain Final chapters delve into nanotechnology in the diagnosis and treatment of cancers the role of nanocarriers for HIV treatment nanoparticles for rheumatoid arthritis treatment peptide functionalized nanomaterials as microbial sensors and theranostic nanoagents Evaluates the latest developments in the fields of phototherapy and nanotherapy Investigates the fundamental physics behind these technologies Explores therapeutic applications across a range of diseases such as skin disorders cancer and neurological conditions Includes case studies that illustrate research in practice Considers challenges and future perspectives

**Hayes' Principles and Methods of Toxicology, Sixth Edition** A. Wallace Hayes, Claire L. Kruger, 2014-10-10 Hayes Principles and Methods of Toxicology has long been established as a reliable reference to the concepts methodologies and assessments integral to toxicology The new sixth edition has been revised and updated while maintaining the same high standards that have made this volume a benchmark resource in the field With new authors and new chapters that address the advances and developments since the fifth edition the book presents everything toxicologists and students need to know to understand hazards and mechanisms of toxicity enabling them to better assess risk The book begins with the four basic principles of toxicology dose matters people differ everything transforms and timing is crucial The contributors discuss various agents of toxicity including foodborne solvents crop protection chemicals radiation and plant and animal toxins They examine various methods for defining and measuring toxicity in a host of areas including genetics carcinogenicity toxicity in major body systems and the environment This new edition contains an expanded glossary reflecting significant changes in the field New topics in this edition include The importance of dose response Systems toxicology Food safety The humane use and care of animals Neurotoxicology The comprehensive coverage and clear writing style make this volume an invaluable text for students and a one stop reference for professionals

**Handbook of Adhesive Technology** Antonio Pizzi, Kashmiri L. Mittal, 2017-12-15 This classic reference examines the mechanisms driving adhesion categories of adhesives techniques for bond formation and evaluation and major industrial applications Integrating recent innovation and improved instrumentation the work offers broad and comprehensive coverage This edition incorporates several new adhesive classes new application topics and recent developments with nanoadhesives and bio based adhesives

Existing chapters are thoroughly updated revised or replaced and authored by top specialists in the field Abundant figures tables and equations appear throughout the work **Engineering Physics for BSc and BE Students** S. L. Gupta,R. K. Gaur,1988 **Navigating Economic Uncertainty - Vol. 1** Veland Ramadani,Abdylmenaf Bexheti,Hyrrije

Abazi-Alili,Carmem Leal,Carlos Peixeira Marques,2024-12-28 This book is the first volume presenting carefully selected chapters from the proceedings of the 7th International Scientific Conference on Business and Economics ISCBE Vila Real Portugal which took place in June 2024 The chapters provide key strategies for thriving in the midst of economic turbulence and explore adaptation innovation and resilience in our modern unpredictable landscape They cover a wide range of areas relevant to contemporary business and economics issues such as economic shocks high inflation energy crisis growth prospects economic forecast labor market gender inequalities migration entrepreneurship firm development and innovations and technological transformation The book is an essential compass for business leaders to navigate market volatility and economic uncertainty *Grassroots Innovation* Hemant Kumar,Gautam Sharma,2024-06-21 This book explores the process of grassroots innovation in the context of the Global South It explains why these bottom up solutions developed by common people are generated due to a lack of available or affordable technology to meet their needs and how they are included in the mainstream imagination of the economy by studying these innovations in India It analyses the grassroots innovation process from idea generation to its implementation Detailing both theoretical and practical dimensions of grassroots innovation the book provides a holistic understanding of the phenomenon by tracing its history in the pre independence discourse on development to the present day policies for institutionalizing these innovations in the mainstream It will provide the readers with a bottom up commentary on innovation and development in the context of the Global South in general and India in particular It adopts a qualitative research design with a wide range of data collected through interviews participant observations and field notes The book contains seven chapters to describe the discourse policy perspectives and current practice of grassroots innovations in general The interdisciplinary timely book provides thoughtful analysis for scholars and upper level students in the fields of technology and innovation management development studies and public management

It's All about Nutrition David Bissonnette,2014-07-01 It s All about Nutrition is an introductory textbook designed specifically to capture the interest of general education students in nutrition Students will want to read this textbook in its entirety as David Bissonnette draws them into a more thoughtful study of the field of nutrition He paints a backdrop describing the origins of our current dietary practices nutrition within the history of human health the emergence of the science of nutrition the history of the U S food industry and the prevalence of malnutrition in the United States during the 1930s Within these historical contexts It s All about Nutrition describes vitamin and mineral deficiencies the obesity epidemic family nutrition chronic disease and world hunger to offer readers a comprehensive look at the field of nutrition in the United States **Advances in the Regulation and Production of Fungal Enzymes by Transcriptomics, Proteomics and**

**Recombinant Strains Design** André Damasio, Gustavo H. Goldman, Roberto N. Silva, Fernando Segato, 2019-10-04 Several efforts have been made in developing strategies to supply the enzyme market as well as in reducing its costs It includes the selection of an appropriate enzyme source and the optimization of enzyme properties and secretion Carbohydrate Active Enzymes CAZymes are industrially relevant biocatalysts that are capable of degrading plant cell wall biomass The most important secreted enzymes related to plant cell wall decomposition are cellulases hemicellulases and auxiliary enzymes These enzymes have been applied in the hydrolysis of plant biomass for the production of second generation 2G ethanol and several other high added value products One of the bottlenecks for 2G ethanol production is the cost of enzymes applied on plant biomass hydrolysis The improvement of proteins production by fungi applying system biology and genetic engineering is an interesting and promising strategy to reduce the enzymes cost and make the 2G ethanol production viable Fungi play an important role in plant biomass degradation and biotechnology by producing and secreting high yields of enzymes In spite of the fact that filamentous fungi present several advantages compared to other microorganisms due to the high level of proteins production heterologous protein production is far from optimal levels and still needs to be improved Currently heterologous production of certain proteins is generally considerably lower than the levels obtained to homologous production Many strategies have been studied in order to improve heterologous production of proteins by filamentous fungi including the deletion of genes that encode for proteases the deletion of lectin like ER Golgi cargo receptors and the co expression of specific chaperones It has been shown that the main bottleneck in the production of heterologous proteins is not caused by the low expression of the target gene An experimental evidence suggests that most target proteins produced in filamentous fungi are lost or stuck in the secretory pathway due to errors in processing modification or misfolding that result in their elimination by endoplasmic reticulum ER quality control Misfolded proteins alter homeostasis and proper ER functioning resulting in a state known as ER stress ER stress activates a conserved signaling pathway called unfolded protein response UPR and ER associated protein degradation ERAD which upregulates genes responsible for restoring protein folding homeostasis in the cell and degrades misfolded protein in the cytosol by the ubiquitin proteasome system The genetic manipulation of individual genes and changes in the genome seems not to be the best alternative to overcome the main bottlenecks in heterologous protein secretion However the understanding of complex interactions of important proteins and genes as well as how they are regulated is more promising

*Automatic Detection Algorithms of Oil Spill in Radar Images* Maged Marghany, 2019-10-08 Synthetic Aperture Radar Automatic Detection Algorithms SARADA for Oil Spills conveys the pivotal tool required to fully comprehend the advanced algorithms in radar monitoring and detection of oil spills particularly quantum computing and algorithms as a keystone to comprehending theories and algorithms behind radar imaging and detection of marine pollution Bridging the gap between modern quantum mechanics and computing detection algorithms of oil spills this book contains precise theories and techniques for automatic identification of oil spills from SAR measurements

Based on modern quantum physics the book also includes the novel theory on radar imaging mechanism of oil spills With the use of precise quantum simulation of trajectory movements of oil spills using a sequence of radar images this book demonstrates the use of SARADA for contamination by oil spills as a promising novel technique Key Features Introduces basic concepts of a radar remote sensing Fills a gap in the knowledge base of quantum theory and microwave remote sensing Discusses the important aspects of oil spill imaging in radar data in relation to the quantum theory Provides recent developments and progresses of automatic detection algorithms of oil spill from radar data Presents 2 D oil spill radar data in 4 D images
