**Psychological Report Writing** Joseph William Hollis, Patsy A. Donn, 1979     Psychological Report Writing Joseph William Hollis, Patsy A. Donn, 1973     **Clinician's Guide To Neuropsychological Assessment** Rodney D. Vanderploeg, 2014-04-04 Neuropsychological assessment is a difficult and complicated process Often experienced clinicians as well as trainees and students gloss over fundamental problems or fail to consider potential sources of error Since formal test data on the surface appear unambiguous and objective they may fall into the habit of overemphasizing tests and their scores and underemphasizing all the factors that affect the validity reliability and interpretability of test data But interpretation is far from straightforward and a pragmatic application of assessment results requires attention to a multitude of issues This long awaited updated and greatly expanded second edition of the Clinician's Guide to Neuropsychological Assessment like the first focuses on the clinical practice of neuropsychology Orienting readers to the entire multitude of issues it guides them step by step through evaluation and helps them avoid common misconceptions mistakes and methodological pitfalls It is divided into three sections fundamental elements of the assessment process special issues settings and populations and new approaches and methodologies The authors all of whom are actively engaged in the clinical practice of neuropsychological assessment as well as in teaching and research do an outstanding job of integrating the academic and the practical The Clinician's Guide to Neuropsychological Assessment Second Edition will be welcomed as a text for graduate courses but also as an invaluable hands on handbook for interns postdoctoral fellows and experienced neuropsychologists alike No other book offers its combination of breadth across batteries and approaches depth and practicality     Psychological Report Writing Joseph William Hollis, Patsy A. Donn, 1979     *Psychological Reports* Raymond L. Ownby, 1997-02-05 Provides a systematic approach to writing psychological reports for optimal clarity thoroughness and impact A clinical report should have all the clarity and precision of a military dispatch Unfortunately as anyone who deals with psychological reports knows this is almost never the case Extensive research has shown that with most psychologist's reports there is a dangerously wide gap between author intent and reader interpretation Since the quality of clinical reports can have a direct bearing on the quality of care a client receives especially in an age of managed care it is essential that psychologists arm themselves with a systematic approach to creating reports that in structure content and style have the utmost clarity thoroughness and utility *Psychological Reports Third Edition* provides them with such an approach The book begins with a theory based analysis of report writing problems which is then used to construct a framework for identifying and correcting them A valuable working resource for practicing psychologists and psychotherapists *Psychological Reports Third Edition* is also must reading for students and psychologists in training A complete guide to writing effective reports for a variety of contexts Updated to correspond to recent changes in the DSM IV Includes practice exercises that help readers build report writing skills Features sample reports representing a wide range of applications     *Writing and Reading Mental*
