**FCC Record** United States. Federal Communications Commission,2017      **Principles of Radio Communication** John Harold Morecroft,1927      The Izon of the Niger Delta Ebiegberi Joe Alagoa,John Pepper Clark,2009-12-29 The Izon of the Niger Delta is a global history of the Izo or Ijaw people from their homelands in the Niger Delta through Nigeria the West and Central African coastlands and in the Africa diaspora into Europe the Americas and the Caribbean It is a preliminary study which raises questions and opens ground for further research The book provides chapters that take an overview of issues on the environment of the Niger Delta an analysis of the Ijo population the language culture resources history and linkage to the rest of Nigeria and the world In effect these chapters provide a synopsis of the Ijo in the past and their situation in the present      *Uganda and Rwanda* ,2000      **Environmental Radiobiology** Paul N. Schofield,Carmel E. Mothersill,2023-10-17 This book focuses on the impacts of anthropogenic radiation on wildlife and ecosystems and provides an in depth look at the approaches and available tools we can use to gain information about biological effects of radiation in the environment The nuclear accidents in Chornobyl in 1986 and Fukushima in 2011 focussed the attention of the world on the vulnerability of ecosystems to radiation In Chornobyl there still remains an exclusion zone where levels are considered to be too high for people and impacts on terrestrial and aquatic ecosystems can still be measured 35 years later In the area impacted by the Fukushima disaster intense remediation is still under way at tremendous cost and causing widespread disruption to the environment That accident impacted the terrestrial and marine ecosystems In both accidents it became obvious that a radiation protection framework focussing on protection of humans a single species and using evacuation as a key strategy was not sufficient to protect the natural environment The complexity of ecosystems makes developing a protection framework very challenging but in order to even start the process it is vital to gather information about likely impacts of low dose exposures on wildlife and to develop monitoring tools to measure changes over time This book contains reviews and original research aimed at filling our knowledge gaps about these important areas Environmental Radiobiology will be a key resource for academics researchers and advanced students of Radiobiology Radioecology Biology Ecology Biomedicine and Research Methods The chapters included in this book were originally published as a special issue of International Journal of Radiation Biology      **Perpetual Trouble Shooter's Manual** John Francis Rider,1949      **Federal Register** ,1994      **Politics and Power** Lisa Martineau,2000      **Communications Regulation** ,2004      **1947 Master Index for Rider Manuals** John Francis Rider,1947      **Archaeology and Culture History in the Central Niger Delta** Abi A.
