The Microeconomics Anti-Textbook Rod Hill, Tony Myatt, 2021-12-02 Mainstream textbooks present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students

The American Economic Review ,2000 **Papers and Proceedings of the Annual Meeting** American Economic Association, 2000 Quantum Economics David Orrell, 2018-07-05 A decade after the financial crisis there is a growing consensus that economics has failed and needs to go back to the drawing board David Orrell argues that it has been trying to solve the wrong problem all along Economics sees itself as the science of scarcity Instead it should be the science of money which plays a surprisingly small role in mainstream theory And money is a substance that turns out to have a quantum nature of its own Just as physicists learn about matter by studying the exchange of particles at the subatomic level so economics should begin by analysing the nature of money based transactions Quantum Economics therefore starts with the meaning of the phrase how much or to use the Latin word quantum From quantum physics to the dualistic properties of money via the emerging areas of quantum finance and quantum cognition this profoundly important book reveals that quantum economics is to neoclassical economics what quantum physics is to classical physics a genuine turning point in our understanding

Economics of Sport Mark J. Experimentation in the Sciences Catherine Allamel-Raffin,Jean-Luc Gangloff,Yves Gingras,2024-04-29 This book takes a novel approach by highlighting comparative and long term historical perspectives on experimental practice The juxtaposition of accounts of natural social and medical experimentation is very enlightening especially because the authors put the emphasis on the different kinds of objects of experimentation physical matter chemical reagents social groups organizations sick individuals archeological remains and demonstrate how much the kinds of objects matter for the practice of experimentation its methods tools and methodologies Taken together the chapters raise several fascinating questions for further study What do these different approaches have in common Why do we call them experimentation What are the intersections among the fields and their developments The volume engages philosophical approaches that are not well known to Anglophone readers Bachelard Bergson Bernard Canguilhem among others and brings to attention a wealth of Francophone secondary literature on past and present scientific experimentation The collection fills a yawning gap in science science studies and philosophy of science teaching making it particularly valuable philosophers and historians of science in all subfields Recording for the Blind & Dyslexic, ... made and when contrary evidence is ignored It shows the claims made without any evidence and the alternative theories that aren't mentioned It shows the importance of power social context and legal framework The Economics Anti Textbook is the students guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on *Journal of Institutional and Theoretical Economics* ,2008 **The Encyclopædia Britannica** Hugh Chisholm,James Louis Garvin,1926
