Red Fog Over America William Guy Carr,1996-01-01 **The Red Fog Over America** William Guy Carr,1962 **The Red Fog Over America. Third Edition, Etc** William Guy CARR,1962 *GEO Year Book 2006* , Cannons and Codes Alison L. LaCroix,Jonathan S. Masur,Martha Craven Nussbaum,Laura M. Weinrib,2021 This edited volume on war in law and literature addresses the many ways in which war affects human society and the many groups of people whose lives are affected by war The essays by preeminent scholars discuss the ways in which literary works can shed light on legal thinking about war and how a deep understanding of law can lead to interpretive insights on literary works Some concern the lives of soldiers others focus on civilians living in war zones who are caught up in the conflict still others address themselves to the home front far from the theatre of war By collecting such diverse perspectives with contributions from preeminent scholars of philosophy literature and law this volume aims to show how literature has reflected the totalizing nature of war and the ways in which it distorts law across domains *GEO Year Book* ,2006 Overview of major global and regional environmental issues and development that shaped policy decisions and actions during the course of the year Emerging challenges new findings presenting scientific progress made in the year that may assist society in recognizing and better understanding emerging environmental issues and help decision makers in designing adequate responses GEO indicators highlighting some of the key global and regional environmental issues and trends that have been identified in GEO reports **Dual-use Objects under International Humanitarian Law: Towards a Paradigm Shift** Francesca Capone,2025-05-29 This book deals with a crucial and yet under explored topic that has increasingly gained momentum during modern armed conflicts i e dual use objects under international humanitarian law IHL Dual use objects such as energy infrastructures water installations and civilian means of transportation and communication which could be used also for military purposes is a term that has entered the IHL jargon but has not attained the status of a legal concept Dual use objects are easily identifiable and yet remain difficult to pin down in particular when it comes to separating them from military objectives and determining the applicable rules to enhance their protection Although attacks against critical infrastructures are traditionally justified as being part of a legitimate military strategy experts and in some instances governments are uncomfortable with the idea of depriving the civilian population of services and goods essential to its survival Yet the sense of discomfort has not led to any significant improvement and dual use objects remain on the target lists of most belligerents A number of factors which this book analyses to explain the rise and rationale behind the current mainstream approach to dual use objects contributed to cementing the status quo The present book building on these premises pursues a twofold aim First this book seeks to fill a significant gap in the IHL scholarship in light of the limited attention that the topic has received so far Second this book aims to challenge the mainstream approach through a rigorous inquiry and the development of a new paradigm The paradigm shift which is at the heart of this study places under the spotlight the civilian function of dual use objects and reclaim the

central role of the individual actors that plan order and execute attacks against these targets This book aspires to become an essential tool for academics and practitioners working in the IHL field but at the same time its readership is expected to include students at all levels that have an interest in the topic and seeks to approach it in an innovative way Francesca Capone is Associate Professor of International Law at the Institute DIRPOLIS of the Scuola Superiore Sant Anna in Pisa Italy
