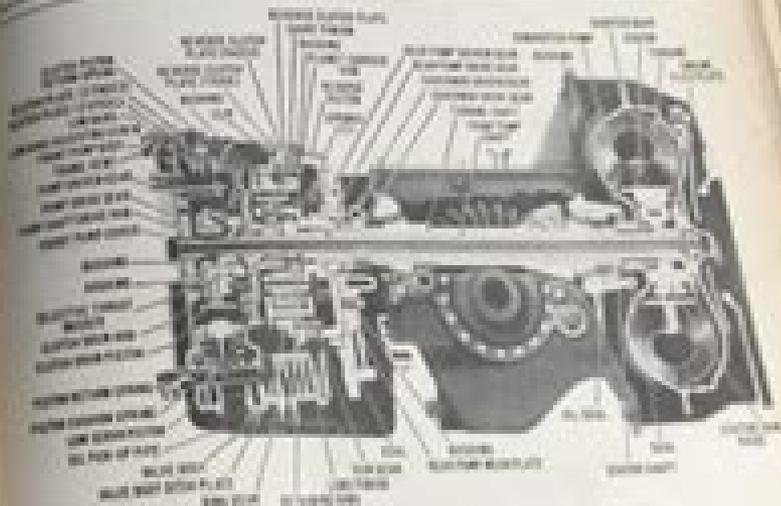

Fig. 1. Powerglide

DESCRIPTION

The Powerglide transmission is a four-speed, manual, sliding-gear type. It is designed to operate with the Corvair engine and provides a wide gear range for efficient power transfer. The transmission is mounted to the chassis and is connected to the rear axle via a driveshaft. The input shaft is connected to the engine, and the output shaft is connected to the rear axle. The gears are arranged in a straight line, and the sliding-gear mechanism allows for smooth shifting between gears.

MAINTENANCE

Adding Oil
The Powerglide transmission requires regular oil changes to ensure proper lubrication and smooth operation. The recommended oil is a high-quality motor oil with a viscosity of SAE 75W-90. The oil level should be checked regularly, and the oil should be changed at the intervals specified in the maintenance schedule. The transmission should also be inspected for leaks and worn components, and any necessary repairs should be made promptly.
