Materials Processing At Casting:

Materials Processing During Casting Hasse Fredriksson,Ulla Åkerlind,2006-05-12 Casting is one of the most important processes in materials technology In this unique book each step in the casting and solidification process is described and models are set up which in many cases can be approximated by simplified analytical expressions All casting methods are featured including component casting ingot casting and continuous casting Applications of the results are given in numerous worked examples within the text Conclusions on how to avoid cracks solidification pores slag inclusions and other defects of the castings can be drawn from the theoretical models These conclusions are based on research results which together give an idea of the development in the manufacture of castings Most chapters conclude with a number of exercises answers to which are given at the end of the book The accompanying Guide to Exercises provides the complete solutions to each of the exercises Materials Processing and Manufacturing Science Rajiv Asthana,Ashok Kumar,Narendra B. Dahotre,2006-01-09 Materials Science in Manufacturing focuses on materials science and materials processing primarily for engineering and technology students preparing for careers in manufacturing The text also serves as a useful reference on materials science for the practitioner engaged in manufacturing as well as the beginning graduate student Integrates theoretical understanding and current practices to provide a resource for students preparing for advanced study or career in industry Also serves as a useful resource to the practitioner who works with diverse materials and processes but is not a specialist in materials science This book covers a wider range of materials and processes than is customary in the elementary materials science books This book covers a wider range of materials and processes than is customary in the elementary materials science books Detailed explanations of theories concepts principles and practices of materials and processes of manufacturing through richly illustrated text Includes new topics such as nanomaterials and nanomanufacturing not covered in most similar works Focuses on the interrelationship between Materials Science Processing Science and Manufacturing Technology **Materials Processing Fundamentals** Lifeng Zhang,Antoine Allanore,Cong Wang,James Yurko,Justin Crapps,2016-12-01 This collection provides researchers and industry professionals with complete guidance on the synthesis analysis design monitoring and control of metals materials and metallurgical processes and phenomena Along with the fundamentals it covers modeling of diverse phenomena in processes involving iron steel non ferrous metals and composites It also goes on to examine second phase particles in metals novel sensors for hostile environment materials processes online sampling and analysis techniques and models for real time process control and quality monitoring systems
