Biomagnetismo:

Biomagnetismo y espiritualidad Antonio Salas Velasco,2013-09-17 Tengo la sensación de que la mayoría de nuestros modelos médicos oficiales y alternativos pretenden funcionar desde una plataforma mecánica. Me necesitan los atiendo me pagan los curo me olvido se enferman Me necesitan los atiendo me pagan los curo me olvido se enferman *ad infinitum* Por otra parte creo que un modelo médico congruente con estos tiempos tendría que operar desde la plataforma de la conciencia donde cada evento en un espacio médico sea una campanada de atención que permita explorar y vividamente el dolor y el desasosiego del paciente e induzca a adir a los que ahí converjan a sentir la vida desde su estructura más esencial. Entonces se revelará un escenario totalmente diferente pleno de posibilidades de relaciones sutiles y esenciales el paciente y el médico se fundirán en una relación mutua de crecimiento comprensión y orden. Se vivirá profundamente la verdadera compasión y esta expansión consciente permitirá descubrir todo evento que en la vida del paciente requiera ser reescrito ante el aparecer de manera clara el amoroso mensaje que su propia crisis le ha estado expresando durante tanto tiempo **El Biomagnetismo**

BIOMAGNETISM Dr. Douglas M. Baker,2014-04-15 BIOMAGNETISM The studies of the effect of Magnetic Fields on living tissues and organs in the human body By Dr Douglas M Baker and G W de la Warr Before this writing the absence of repeatable physiological effects relegated any possible curative properties of magnets to the practice of complete charlatanry. Experimentation in the field of biomagnetism has tended to be somewhat haphazard with little idea of ultimate aim. The work that has been carried out on human subjects has been directed mainly to the observation of possible effects of magnetic fields rather than to obtaining specific results. In our own work which forms the subject of this book we set out with a definite purpose in view and have accordingly adapted our research technique to that end. As a result we can now postulate that all human tissues may respond to some sort of magnetic influence complex subtle or powerful though it may have to be. Our object was to show that by the application of magnetic fields to the human body it was possible to obtain response from tissues in proximity to and distant from the fields. These tissues might or might not themselves demonstrate the effects directly but they might well contribute to a systemic or bodily response of physiological significance. Many independent laboratory results charts pictures and construction drawings included here will aid your understanding and personal

application of the knowledge gained by these eminent researchers at the Delawarr Laboratories Oxford England
