The author conducted empirical research with a German IT company's staff and its leadership in a longitudinal way. The whole team was trained in individual mindfulness competencies. Individual mindfulness is a state of being that can be developed through mindfulness meditation. When combined with social interactions, cultural adaptations, and structural changes, collective mindfulness develops. Collective mindfulness allows an organisation to become more agile. The author argues that mindfulness training influences the openness and knowledge sharing behaviour of an organisation first on an individual and then a collective level. Such training can generate awareness, increase empathy between the team members, and lead towards a more successful organisation. This study can inspire team managers to improve the work environment as well as academics to update their current level of research in the field of individual and collective mindfulness.

Services Quarterly, 2004 *The Narrowing* Alexandra Shaker, PhD, 2025-03-04 An exploration of the connection between anxiety and the body by a clinical psychologist drawing from the latest research alongside historical and cultural insights

arguing that only through understanding anxiety's grasp on us can we transform it into resilience. Most of us are intimately familiar with anxiety and with its increasing hold on our minds, our hopes and plans, and our bodies. But how well do we really understand it and what can we do to transform it into something new: into resilience or courage or creativity? In this extraordinary book, Dr. Alexandra Shaker, a clinical psychologist, takes us on a journey through the body from brain to blood to heart to guts to examine the connections between our emotional, psychological, and physical lives. She unravels what the body can teach us about anxiety and what we can learn from our long cultural history of the anxious impulse. Melding psychology, neuroscience, history, and literature, she considers why, despite all the checklists and scientific advancements, we are still struggling to outrun our oldest terrors and how a new approach focused on accepting anxiety as part of the human condition can help revolutionize our relationship with it.

Mindfulness and Self-Leadership. Investigating the Impact of Daily Meditation Practices Cindy Krzykowski, 2024-05-08. Master's Thesis from the year 2021 in the subject Leadership and Human Resources. Miscellaneous grade 1-3. University of Applied Sciences Berlin. Language: English. Abstract: This master's thesis aims to investigate whether self-leadership skills can be improved through mindfulness practices, particularly meditation. The study involves a quantitative, anonymous examination of 138 volunteers over an eight-week period during which participants engaged in daily five to ten-minute meditation sessions and completed surveys assessing mindfulness and self-leadership. The central research question guiding this study is: Can mindfulness practices, specifically meditation, strengthen self-leadership skills? This question drives the empirical investigation into the potential link between mindfulness and self-leadership, aiming to provide practical insights into the effectiveness of mindfulness practices in personal and professional development. Drawing from organizational management, psychology, and neuroscience, the theoretical framework of the thesis provides a foundational understanding of self-leadership, mindfulness, and meditation. By exploring how these concepts intersect, the thesis seeks to elucidate the mechanisms underlying their potential impact on self-leadership. In the empirical section, the methodology employed for the study is outlined, detailing the research design, survey construction, and data analysis techniques. Through careful analysis of the collected data, the study aims to discern any effects of meditation on self-leadership skills while also considering potential demographic influences. By bridging theory and practice, this thesis endeavors to contribute to the understanding of how mindfulness practices, particularly meditation, can enhance self-leadership skills. It offers valuable insights for individuals and organizations seeking to leverage mindfulness practices for personal and professional growth in today's challenging work environments. In summary, this thesis serves as a platform for exploring the relationship between mindfulness and self-leadership in a pragmatic and accessible manner, aiming to provide actionable insights for fostering individual effectiveness and well-being.

Minding Closely B. Alan Wallace, 2021-02-02. Draws on wisdom from both Theravada and Vajrayana traditions to offer a systematic and practical approach to liberation through mindfulness. Jack Kornfield, author of *The Wise Heart*, bringing his experience as a monk, scientist, and contemplative.

Alan Wallace offers a rich synthesis of Eastern and Western traditions along with a comprehensive range of mindfulness meditation practices interwoven throughout the text. An ideal reference for both students and teachers, *Minding Closely* presents the guided meditations systematically, beginning with very basic instructions which are then gradually built upon as one gains increasing familiarity with the practice. This edition includes a new preface and three never before published translations by B. Alan Wallace from three renowned traditional Buddhist works on mindfulness: *Relax and Be Aware* by Sayadaw U Tejaniya, Doug McGill, 2019-12-10. A lucid practical guide to develop relaxation, awareness, mental clarity, and spiritual insight in your daily life. Since mindfulness is known to be so physically, mentally, and spiritually beneficial, why not practice it right now? Why not in every moment? Burmese Buddhist master Sayadaw U Tejaniya writes that we can indeed practice in this way, and the key is not forceful effort but rather a continuous, gentle remembering of our intention to renew our awareness. Thirty-one short chapters, *A Month of Daily Life Meditations*, show precisely how to build a daily life meditation practice that steadily develops relaxation, refreshment, and enlightenment. The right time to meditate is all day long, from the moment we wake up and open our eyes until the moment we fall asleep at night, writes U Tejaniya. If you are practicing correctly with right effort, it will definitely bring peace and joy. *The Nurse's Meditative Journal* by Sherry Kahn, 1996. When life's challenges seem overwhelming, often it's because we're looking outside ourselves for the answers. Author Sherry Kahn leads you to a fuller understanding of your only true, life-long companion: yourself, through an exploration of the arts of meditation and journaling. **Pannell's Reference Book for Home and Office**, Pannell, 1907.
