Integrating Worlds Scott D. Carpenter, Helena Kaufman, Malene Torp, 2023-07-03 What if our students learn the most when they're far from campus Integrating Worlds demonstrates how high quality off campus study epitomizes integrative

learning both supporting and enhancing the entire undergraduate experience While off campus study both study abroad or study away occupies a marginal position on most campuses it has the almost unique capacity to bring together a high concentration of high impact educational practices When we combine global learning with collaborative work shared intellectual pursuits learning communities and more these practices reinforce each other exerting a multiplier effect that can potentially result in the most intense learning experience our students will have It can energize and inspire them for the work they will continue to undertake on their home campus It thus becomes crucial for us to identify or design high quality programs that will achieve these goals Moreover we need to reimagine off campus study as an integrated portion of the undergraduate arc one that begins well before our students depart and continues long after they return In this way we help them understand the interconnectedness not only of the world but also of their own education At the same time the authors recognize material constraints and educational imperatives Off campus study costs money its complexity makes it difficult to assess it overlaps increasingly with internships and civic engagement and by its nature it is more subject to external forces than the on campus experience In careful practical ways Integrating Worlds advances suggestions for dealing with these issues This book urges educators to go beyond the episodic ways we currently link on campus curricula to off campus experience While of interest to specialists in international or intercultural education it speaks most directly to faculty deans and provosts many of whom may have little or dated experience of study abroad and who thus feel unprepared to address this issue of pressing importance As our disciplines and institutions face the complexities of a rapidly changing world this book seeks to fuel the necessary conversations
