**Adapt** Tim Harford, 2011-05-10 The Undercover Economist famed for his explanations now offers solutions Tim Harford introduces a new way of thinking about how to solve the world's most urgent problems from climate change to terrorism African poverty to global finance even the problems we encounter in our own daily lives When faced with such challenges we instinctively look to leaders experts and gurus to provide us with pre-chewed solutions Harford argues that the world has become too unpredictable and complex for that Instead we must adapt improvise rather than plan work from the bottom up take baby steps Adapt draws on exciting new work by passionate young economists and on innovative ideas from across the sciences It looks at how and why innovation really comes about extolling the value of trial and error and arguing that we should learn to embrace failure Above all Adapt applies hard-won lessons learned in the field from a spaceport in the Mojave Desert to the street of Iraq from a blazing offshore drilling rig to the frozen tundra of Siberia The book shows that it's up to individuals us to change the world

embark on your own road to greatness      **Intellectual Property Excesses** Enrico Bonadio, Aislinn O'Connell, 2022-06-30  
This collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property IP may lead to. It collects and comments on a series of IP disputes which have taken the notion of IP protection to extremes. From individuals being sued for hundreds of thousands of dollars for sharing a playlist to sports spectators being arrested for wearing the wrong dresses, passing through granting patents for inventions obtained by misappropriating traditional knowledge and trademark protection of merely descriptive signs, this book brings together a broad range of examples from across the IP spectrum where protection and enforcement have been used or threatened on unreasonable and/or untenable grounds. The aim of the book is to criticise these excesses precisely because they harm IP and because they contribute to creating an environment where more and more people are led to hate IP and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade competition and people's freedom. This is not therefore a book against IP; it is instead a call for change and an attempt to save IP through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism. The book includes a foreword by Jason Mazzone, Albert E. Jenner Jr., Professor of Law at the University of Illinois, USA.
