This book is a collection of contributions presented at the 16th annual international symposium Frontiers of Fundamental Physics FFP16 supported by Istanbul University As a document of the latest occurrence of this very important gathering it presents the most recent advances in fundamental physics and physics teaching For nearly fifteen years the FFP has attracted some of the greatest physicists in the world The broad objective of the entire endeavor has been to enable scholars working in slightly different areas to meet on a single platform Even with this particular year's safety restrictions arising from Covid we feel that the general mission has been carried out as fully as in any year The book features addresses given by a host of expert contributors all of which are organized according to seven individual themes The areas covered include Astronomy and Astrophysics Particle Physics Theoretical Physics Gravitation and Cosmology Computational Physics Condensed Matter Physics Complex Systems and related areas This book should prove to be a veritable bounty for anyone with an interest in the continued evolution of our understanding of the physical world

Everyday Physics: Colors, Light And Optical Illusions Michel A Van Hove, 2021-09-07 This book aims to popularize physics by emphasizing conceptual ideas of physics and their interconnections while avoiding mathematics entirely The approach is to explore intriguing topics by asking and discussing questions thereby the reader can participate in developing answers which enables a deeper understanding than is achievable with memorization The topic of this volume Colors light and Optical Illusions is chosen because we face colors and light every waking minute of our lives and we experience optical illusions much more often than we realize This book will attract all those with a curious mind about nature and with a desire to understand how nature works especially the younger generation of secondary school children and their teachers

Left-brain Lutherie David C.
