Du Uml Eyrolles:

Sustainable IT Architecture Pierre Bonnet, Jean-Michel Detavernier, Dominique Vauquier, Jerome Boyer, Erik Steinholz, 2013-03-01 Sustainable IT Architecture The Progressive Way of Overhauling Information Systems with SOA This book focuses on Service Oriented Architecture SOA the basis of sustainable and more agile IT systems that are able to adapt themselves to new trends and manage processes involving a third party The discussion is based on the public Praxeme method and features a number of examples taken from large SOA projects which were used to rewrite the information systems of an insurance company as such decision makers creators of IT systems programmers and computer scientists as well as those who will use these new developments will find this a useful resource *Digital Libraries* Fabrice Papy, 2016-01-29 The technological interoperability of digital libraries must be rethought in order to adapt to new uses and networks Informative digital environments aimed at responding to heritage cultural scientific or commercial demands have taken over the global cyberspace and have redesigned the techno informative landscape of the Web However while the technological models demonstrate their effectiveness and explain to a large extent the creation of digital libraries archives and deposits the subjacent concept of uses continues to cause debate The information technologies used by heterogeneous digital libraries enable a technical interoperability of content This is not enough to allow the adhesion of a public connected to very different information profiles and techniques This book explores the avenues of a user orientated interoperability where the questions of consultation interfaces and content description processes are studied Discusses Metadata as a resource for linking Provides a practical approach A valuable resource for anyone involved in digital library developments and digital collections and services **Ecosystems Knowledge** Samuel Szoniecky, 2018-07-31 To analyze complex situations we use everyday analogies that allow us to invest in an unknown domain knowledge we have acquired in a known field In this work the author proposes a modeling and analysis method that uses the analogy of the ecosystem to embrace the complexity of an area of knowledge After a history of the ecosystem concept and these derivatives nature ecology environment from antiquity to the present the analysis method based on the modeling of socio semantic ontologies is presented followed by practical examples of this approach in the areas of software development digital humanities Big Data and more generally in the area of complex analysis Innovative Concepts for Agent-Based Systems Walt Truszkowski, Chris Rouff, Mike Hinchey, 2003-10-21 This collection represents the proceedings of the 1st GSFC JPL Workshop on Radical Agent Concepts WRAC which was held on 16 18 January 2002 at the Science Applications International Corporation SAIC Conference Center in McLean VA USA Over the past few years agent technology has emerged as a powerful force in computing Agent technology may well form the foundation for the next generation of computing systems New and innovative agent concepts and techniques may bring further developments to this exploding area of research Such work is often strongly inspired by theoretical or empirical studies of human behavior social intelligence psychology arts biology computer

science and philosophy This workshop aimed at bringing together in an interdisciplinary event or in a thinkers practitioners and academics with an interest in radical very innovative concepts for agent based systems The workshop provided a forum to present the latest research findings in many aspects of agent technology The organizers welcomed participation by those working in agent architectures agent communities agent communications agent modeling agent applications and other agent related areas We were particularly seeking papers on novel and innovative ideas pushing the envelope of current agent technology Contributions without a prototype or working system i e purely conceptual contributions were welcomed and out of the box thinkers were especially encouraged to participate The workshop was structured so as to allow the participants adequate time for discussion and interaction to exchange ideas and reflect on the motivations scientific grounds and practical consequences of the concepts presented Livres hebdo, 2008 **Knowledge Acquisition, Modeling and Management** Rudi Studer, 2003-06-29 Past Present and Future of Knowledge Acquisition This book contains the proceedings of the 11th European Workshop on Knowledge Acquisition Modeling and Management EKAW 99 held at Dagstuhl Castle Germany in May of 1999 This continuity and the high number of sessions reflect the mature status of the knowledge acquisition community Knowledge Acquisition started as an attempt to solve the main bottleneck in developing expert systems now called knowledge based systems Acquiring knowledge from a human expert Various methods and tools have been developed to improve this process These approaches significantly reduced the cost of developing knowledge based systems However these systems often only partially fulfilled the task they were developed for and maintenance remained an unsolved problem This required a paradigm shift that views the development process of knowledge based systems as a modeling activity Instead of simply transferring human knowledge into machine readable code building a knowledge based system is now viewed as a modeling activity A so called knowledge model is constructed in interaction with users and experts This model need not necessarily reflect the already available human expertise Instead it should provide a knowledge level characterization of the knowledge that is required by the system to solve the application task Economy and quality in system development and maintainability are achieved by reusable problem solving methods and ontologies The former describe the reasoning process of the knowledge based system i e the algorithms it uses and the latter describe the knowledge structures it uses i e the data structures Both abstract from specific application and domain specific circumstances to enable knowledge reuse **L'informatique au service du patient** M. Fieschi, O. Bouhaddou, R. Beuscart, R. Baud, 2000-05 Le 12ⁱme volume de la collection Informatique et Sant est consacré au thème de L Informatique au service du patient L avènement de la télématique et la formidable expansion de l Internet ont en quelques années bouleversés les habitudes de travail Le monde de la Sant est particulièrement concerné par cette mutation soulevant la fois espoirs et craintes enthousiasme et perplexité La pratique médicale moderne ne se conçoit plus sans le support de réseaux informatiques toujours plus performants et plus tendus Cet ouvrage se propose de donner l état de l art sur les applications de l informatique au service du patient la problématique des réseaux informatiques dans le domaine de

la santé et des grands enjeux de société qui lui sont associés

Knowledge Acquisition, Modeling and Management Dieter Fensel, Rudi Studer, 1999-06-22 This book constitutes the refereed proceedings of the 11th European Workshop on Knowledge Acquisition Modeling and Management EKAW 99 held at Dagstuhl Castle Germany in May 1999 The volume presents 16 revised full papers and 15 revised short papers were carefully reviewed and selected from a high number of submissions Also included are two invited papers The papers address issues of knowledge acquisition i e the process of extracting creating structuring knowledge etc of knowledge level modeling for knowledge based systems and of applying and redefining this work in a knowledge management and knowledge engineering context
