Serreco, 2023 *The Dynamics of Entrepreneurship* Maria Minniti, 2013-02-14 As governments across the world look to entrepreneurship as a way to increase the wealth and well being of their countries this volume brings together leading scholars to provide a comprehensive overview of entrepreneurial activity based on empirical data

Handbook of Entrepreneurial Dynamics William B Gartner, Kelly G. Shaver, Nancy M Carter, Paul D Reynolds, 2004-06-21 This important Handbook of Entrepreneurial Dynamics reports on the Panel Study of Entrepreneurial Dynamics PSED the most comprehensive scientifically representative study to date of nascent entrepreneurs The book is unique because the study identified individuals in the process of creating new businesses to understand how at its very source people move from considering the option of starting a new business to its actual founding This has never been done before in the history of entrepreneurship research I cannot recommend this book more strongly to entrepreneurship scholars and those interested in where entrepreneurs come from and how they move from their initial idea to new venture founding Claudia Bird Schoonhoven University of California Irvine This Handbook makes a terrific contribution to understanding entrepreneurship and new business creation Its 38 chapters report major findings from the Panel Study of Entrepreneurial Dynamics PSED an unprecedented research program involving more than a hundred researchers from 10 countries This Handbook is must reading for anyone interested in entrepreneurship research Andrew H Van de Ven Carlson School of Management University of Minnesota Entrepreneurial activity provides profound positive benefits across an important set of measures of social and economic well being much of it concentrated in new economic sectors such as information technology Yet even though entrepreneurship has been shown to provide many benefits it is surprising that there has not been a systematic study of the entrepreneurial process The Handbook of Entrepreneurial Dynamics The Process of Business Creation fills this gap by offering theories ideas and measures that can be used to explore and understand the factors that encompass and influence the creation of new businesses The chapters in the handbook provide the rationale for questionnaires used in the Panel Study of Entrepreneurial Dynamics PSED The PSED is a research program that was initiated to provide systematic reliable and generalizable data on important features of the new business creation process The PSED includes information on the proportion and characteristics of the adult population involved in efforts to start businesses the activities and characteristics that comprise the nature of the business start up process and the proportion and characteristics of those business start up efforts that actually become new businesses The handbook also describes the PSED data collection process provides documentation of the interview schedules codebooks data preparation and weighting scheme as well as offers examples of how analyses of PSED data might be conducted The authors identify specific measures that can be used to operationalize theory as well as provide evidence from the PSED data sets on these measures reliability

and validity The Handbook of Entrepreneurial Dynamics is ideal for a sizeable audience including graduate students academics and librarians in schools of business and management who need a comprehensive reference on business creation In addition researchers and policy makers at the federal state and local level will find this an invaluable reference covering all of the factors involved in new venture formation Key Features Considers categories of data not available prior to the PSED Includes a comprehensive overview of theories about new business formation Provides demographics of nascent entrepreneurs Analyzes the cognitive characteristics of nascent entrepreneurs Explores all of the processes of new business formation

The Entrepreneurship Dynamic Claudia Bird Schoonhoven, Elaine Romanelli, 2001 New organizations do not emerge full blown from the idiosyncratic minds of individual entrepreneurs Their ideas for new organizations their ability to acquire capital and other essential resources and their likelihood of survival as entrepreneurs derive from the contexts in which they live and work The Entrepreneurship Dynamic explores the conditions that prompt the founding of large numbers of new organizations or entirely new industries and the effects on existing industries economies and societies *Business Creation in the United States* Paul Davidson Reynolds, Richard T. Curtin, 2008 This monograph presents the results of The Panel Study of Entrepreneurial Dynamics PSED II and is the only nationally representative dataset of new business creation providing a critical source of information on the early stages of the entrepreneurial process *The Dynamics of Entrepreneurial Ecosystems* Allan O'Connor, Colin Mason, Morgan P. Miles, David B. Audretsch, 2021-12-27 This book aims to provide new approaches to analysing and thinking about how entrepreneurial ecosystems develop and evolve over time as well as shed light on the relatively unexplored area of entrepreneurship ecosystem dynamics The concept of entrepreneurial ecosystems has emerged as a framework to understand the nature of places in which entrepreneurial activity flourishes Time is fundamental to the analysis of the dynamics of an entrepreneurial ecosystem New firm creation survival growth and demise all occur within a temporal context

that is over and within time Systems approaches to research invariably model the influential effects of the actors and elements that shape re shape maintain shift and change the system itself An entrepreneurial ecosystem point of view therefore is inherently time dependent and provides an analytical framework that reveals how the number and diversity of entrepreneurial actors situated in a place and time influence the creation of new firms their survival growth and ultimately the stability of markets and industry in a time and place Whether for better or worse the historic and present time dimensions underpin the functioning and trajectory of entrepreneurial ecosystem performances and how they are shaped over time Each chapter in this edited volume outlines a particular perspective and or a unique case drawn from a range of countries that collectively reveal the dynamics of an ever changing entrepreneurial ecosystem The chapters were originally published as a special issue of the journal *Entrepreneurship and Regional Development* *Dynamics of Entrepreneurial Development and Management* Vasant Desai,2001 **Entrepreneurship and Dynamics in the Knowledge Economy** Charlie Karlsson,Börje Johansson,Roger Stough,2006-09-27 In this book the authors argue that there are analytically distinct forms of entrepreneurship They provide a contemporary overview of current research and summarize the policy conclusions that can be drawn The Dynamics of Entrepreneurship Maria Minniti,2011 As governments across the world look to entrepreneurship as a way to increase the wealth and well being of their countries this volume brings together leading scholars to provide a comprehensive overview of entrepreneurial activity based on empirical data R sum de l diteur The Dynamics of Entrepreneurship Erik Dahmén,Leslie Hannah,Israel M. Kirzner,1994-01-01 Entrepreneurship, Growth, and Innovation Enrico Santarelli,2006-03-29 The analysis of different national cases including Germany Greece Italy Portugal Turkey the Netherlands and the United States puts forward that the relationship between entrepreneurship and growth via innovation is shaped by the context of country specific institutions and industries thereby providing hints for industrial and innovation policy *Dynamic Entrepreneurship* Katja Rusinovic,2006 Annotation The nature of immigrant entrepreneurship is changing in Dutch society Nowadays many immigrant entrepreneurs start businesses in producer and personal services instead of more traditional sectors such as retail or hotel and catering At the same time a growing number of second generation immigrants are setting up their own firms in the Netherlands These second generation immigrants born and or raised in the receiving country are following different trajectories in comparison with first generation immigrant entrepreneurs indeed displaying a move away from traditional immigrant niches Yet studies on second generation immigrant entrepreneurs remain limited in both the Dutch and international literature on this subject This study presents one of the first explicit comparisons between first and second generation self employed immigrants The embeddedness of immigrants in local and transnational networks and the dynamics of the markets in which these entrepreneurs are active are examined based on in depth interviews with immigrant entrepreneurs in Dutch cities In doing so this study provides a vivid longitudinal view of first and second generation immigrant entrepreneurs their incorporation into Dutch society their businesses and
