national markets is becoming increasingly difficult. Indeed, the economic sphere is in constant flux, which demands that companies have a great capacity for adaptation to face the new challenges of an ever more globalized and difficult market. In this context, new forms of business communication are emerging, especially through the web and new technologies. The chapters provide a comprehensive review of the why, what, and how of disseminating corporate information and promoting corporate digital communication into internationalization processes. These strategies can be related to the development of digital tools, the design of new corporate communication strategies, the proposal of new ways of breaking social and linguistic barriers between technology users, or the creation of new methodologies aimed at evaluating the effectiveness of digital marketing strategies. This book is ideal for marketers, managers, executives, entrepreneurs, practitioners, researchers, academicians, and students interested in new corporate communication strategies and their effectiveness.
