Libro Neurociencia Y Conducta Kandel:

Neurociencia y conducta Eric R. Kandel, James H. Schwartz, Thomas M. Jessell, 1996 *Moral y civilización. Una historia* Juan Antonio Rivera, 2024-02-07 Un fascinante recorrido por la biología a la psicología a la filosofía a la política y la economía para explicar la evolución del comportamiento humano del altruismo tribal en la Prehistoria a la ética del respeto en la civilización contemporánea. Como hemos pasado de sociedades pequeñas de cazadores recolectores en las que cualquier miembro ajeno a ellas era considerado un enemigo a coexistir en civilizaciones extensas en las que nos codeamos cada día con multitud de desconocidos. Qué se ha removido en nosotros para pasar del impulso xenofóbico de hacer la guerra a los forasteros a convivir con ellos tratándolos con benigna desatención. Como ha sido el tránsito de la ética de la sabana a la ética de la civilización. Se ha producido una evolución importante desde la moral que imperaba hace millones de años en las minúsculas colectividades de nuestros ancestros hasta la actual moral de las civilizaciones extensas. Hemos alcanzado lo que se denomina dominio ecológico: estamos en lo alto de la cadena trófica y ya no tenemos depredadores importantes de los que preocuparnos. Ahora las principales presiones de selección que se ejercen sobre nuestra especie proceden de ella misma. Juan Antonio Rivera aborda en este libro desde el enfoque de la ética evolucionista los grandes cambios que ha experimentado el comportamiento humano a lo largo de la historia propulsados por dos factores clave: el tamaño y la complejidad en aumento de los grupos humanos y la aparición del individualismo como fenómeno cultural en Occidente. Además reconstruye con increíble maestría la compleja historia de una idea fundacional en la ética de las sociedades modernas: el respeto. LEV, 1999 Psicopatología forense Aura Itzel Ruiz Guarneros, Eric García-López, 2022-06-20 Esta obra colectiva contribuye al fortalecimiento de las relaciones entre neurociencia y derecho penal mostrando por qué la psicopatología forense es el puente natural de comunicación aplicada entre ambas disciplinas y el sistema de justicia. Asimismo propone rutas de trabajo con la criminología a la victimología y la filosofía entre otras áreas fundamentales de estudio. El libro que el lector tiene en sus manos es fruto del Seminario Permanente en Neuroderecho y Psicopatología Forense del INACIPE donde especialistas de diversas áreas comparten sus aportaciones en esta materia así como las fragilidades y retos a enfrentar en su estudio tanto en el ámbito de la academia como en su aplicación dentro del sistema de justicia destacando como eje fundamental el trabajo multidisciplinario. **Libros españoles en venta, ISBN**, 1997 *Developing Culturally and Historically Sensitive Teacher Education* Yolanda Gayol Ramírez, Patricia Rosas Chávez, Peter Smagorinsky, 2020-09-17 Shortlisted for the UK Literacy Association's Academic Book Award 2021. This volume explores the literacy education master's degree program developed at Universidad de Guadalajara in Jalisco, Mexico with the aim of addressing the nation's emerging social, economic, technological, and political needs. Developing the program required taking into account the cultural diversity, historical economic disparities, indigenous and colonial cultures, and power inequities of the Mexican nation. These conditions have produced economic structures that maintain the status quo that concentrates wealth and opportunity in the hands of the very few, creating challenges for the

education and economic life for the majority of the population The program advocates providing tools for youth to critique and change their surroundings while also learning the codes of power that provide them a repertoire of navigational means for producing satisfying lives Rather than arguing that the program can be replicated or taken to scale in different contexts the editors focus on how their process of looking inward to consider Mexican cultures enabled them to develop an appropriate educational program to address Mexico s historically low literacy rates They show that if all teaching and learning is context dependent then focusing on the process of program development rather than on the outcomes that may or may not be easily applied to other settings is appropriate for global educators seeking to provide literacy teacher education grounded in national concerns and challenges The volume provides a process model for developing an organic program designed to address needs in a national context especially one grounded in both colonial and heritage cultures and one in which literacy is understood as a tool for social critique redress advancement and equity

Trastornos del desarrollo David Freides, 2002-09-25. Este libro trata sobre las discapacidades que afectan a los niños y derivan de cierto funcionamiento defectuoso del cerebro o del sistema nervioso. Partiendo de la premisa de que estas discapacidades se producen a causa de un deterioro en el sistema nervioso, es esencial conocer la actividad de esta respuesta del niño a la discapacidad y la naturaleza global de la conducta del niño con objeto de explicar las razones de que algunos tratamientos sean efectivos y otros no.
