### **A Critical Review of Australia's Regulatory Oversight For New Generation Personalised Medical Devices Aman**

Grewal,2024-09-16 Australia's medical device regulator Therapeutic Goods Administration TGA generally uses the term personalised medical device to describe medical devices made available to address specific individual requirements 2019 Regulatory amendments including new definitions for personalised medical devices involved the subdivision of personalised medical devices into three categories of custom made medical devices patient matched medical devices and adaptable medical devices and the adaptation of the International Medical Device Regulatory Forum's IMDRF's definitions for personalised medical devices This book highlights inadequacies and oversights in the current regulatory regime and explores possible solutions to address them The study focuses on the regulatory control of personalised medical devices in Australia but elements of the proposed regime are also compared with similar elements within the United States and South Korean medical device regulatory frameworks The book also explores some technically complex medical and legal principles and issues that arise and interact with each other in the application of personalised medical devices It concludes with specific observations and recommendations aimed at improving the current Australian regulatory framework for new generation personalised medical devices This study also examines the benefits and drawbacks of the IMDRF led regulatory reforms in various international jurisdictions The IMDRF is spearheading medical device international regulatory alignment therefore the scope and significance of the information discussed is important in international jurisdictions This detailed study is a key reference work for academic researchers medical device manufacturers and sponsors and legal and regulatory experts

### **Sterilisation of Tissues Using Ionising Radiations J F Kennedy,Glyn O. Phillips,Peter A. Williams,2005-05-06 Existing**

methods and processing for sterilising tissues are proving inadequate in many instances Infections have been transmitted from the graft to the recipient and in the USA the Centre for Disease Control and other regulatory bodies have drawn attention to the need for a reliable end sterilisation method which does not damage the functionality of the final tissue Safety of surgical allografts is therefore a major concern due to microbial and viral contamination of tissues which is now a problem even in the most sophisticated centres The Presidents of the main Professional Association of Tissue Banks American European and Latin American met in Vienna to review the situation and concluded that the time was opportune to organise an international high level expert meeting which would identify the best method of using radiation technology to assist in the production of safe tissue allografts Sterilisation of biological tissues with ionising radiations provides the information on this subject presented at an international meeting in Wales supported by the International Atomic Energy Agency New methods of protecting the tissues were presented which at the same time allow the use of sufficiently high doses of ionising radiations to inactivate invading organisms A Code of Practice for the Radiation Sterilisation of Tissues was evaluated and the outcome and the full Code is included in this volume as well as explorations of all of the methodologies used in the field Sterilisation of

biological tissues with ionising radiations is the only volume of its kind and as such is an invaluable source of information for those working in tissue banks transplant surgeons and the safety regulators High quality papers highlighting the most recent developments in this important area Includes the full code of practice for the radiation sterilisation of tissues Edited by a highly respected team of experts **Cook & Hussey's Assistive Technologies** Albert M. Cook,Janice Miller
