**NON-DESTRUCTIVE TESTING OF CIVIL STRUCTURES**. LEO. MCKIBBINS, 2022      **Non-destructive Testing of Materials in Civil Engineering** Krzysztof Schabowicz, 2019 This book was proposed and organized as a means to present recent developments in the field of nondestructive testing of materials in civil engineering For this reason the articles highlighted in this editorial relate to different aspects of nondestructive testing of different materials in civil engineering

from building materials to building structures The current trend in the development of nondestructive testing of materials in civil engineering is mainly concerned with the detection of flaws and defects in concrete elements and structures and acoustic methods predominate in this field As in medicine the trend is towards designing test equipment that allows one to obtain a picture of the inside of the tested element and materials From this point of view interesting results with significance for building practices have been obtained
