

Onboard power supply

The electrics box

Housed in the electrics box are the fuses for components of the engine compartment and the interior.

The connection between electrics box and battery is very short (approx. 500 mm), which enables use of the battery as a high frequency filter between the consumers mounted directly on the box.

Due to the increased number of fuses, the rating of the fuses can be set to the individual consumers.

Fitting location

The electrics box can be found on the left in the engine compartment.

Electrics box
