Ministry of Education, 2002 *The Ontario curriculum*, 1998 *Feminist Research for 21st-century Childhoods* B. Denise Hodgins, 2019-03-21 This book is a collection of feminist childhood studies stories from field research with educators young children and or early childhood student educators that explores the challenges tensions and possibilities of common worlds research methods for the 21st century Grounded in a common worlding orientation the contributing authors grapple with complex methodological understandings within postqualitative practices within settler colonial states Australia Canada South Africa and the Unites States Each chapter presents a method the authors have put to work in their efforts to unsettle the interpretative power of Euro Western developmental knowledges and anthropocentric frameworks to reimagine research amid the colonialist social and environmental challenges we face today The research ing stories act as provocations for generating innovative relational and emergent methods to attend to the complexity of 21st century childhoods Just as developmental and sociological perspectives gave birth to new forms of inquiry within childhood studies in 19th century industrialization and 20th century urban change respectively the 21st century requires novel questions practices and methodologies to enhance the childhood studies lexicon In the field of childhood studies where settler colonial and neoliberal logics have so much clout such strategies are crucial Feminist Research for 21st century Childhoods is an important and relevant read for anyone working and researching with children **Engineering in Pre-College Settings** Şenay Purzer, Johannes Strobel, Monica E. Cardella, 2014-11-15 In science technology engineering and mathematics STEM education in pre college engineering is not the silent e anymore There is an accelerated interest in teaching engineering in all grade levels Structured engineering programs are emerging in schools as well as in out of school settings Over the last ten years the number of states in the US including engineering in their K 12 standards has tripled and this trend will continue to grow with the adoption of the Next Generation Science Standards The interest in pre college engineering education stems from three different motivations First from a workforce pipeline or pathway perspective researchers and practitioners are interested in understanding precursors influential and motivational factors and the progression of engineering thinking Second from a general societal perspective technological literacy and understanding of

the role of engineering and technology is becoming increasingly important for the general populace and it is more imperative to foster this understanding from a younger age Third from a STEM integration and education perspective engineering processes are used as a context to teach science and math concepts This book addresses each of these motivations and the diverse means used to engage with them Designed to be a source of background and inspiration for researchers and practitioners alike this volume includes contributions on policy synthesis studies and research studies to catalyze and inform current efforts to improve pre college engineering education The book explores teacher learning and practices as well as how student learning occurs in both formal settings such as classrooms and informal settings such as homes and museums This volume also includes chapters on assessing design and creativity
