**Phosphoric Acid** Rodney Gilmour, 2014 Preface Within three months of joining Albright I have felt at times like the last Mohican Chapter 1 includes a brief historical review to place the current technology in context As I began to write it I suspected that a number of significant technological leaps would emerge and this has proven to be the case *Phosphoric Acid* Rodney Gilmour, 2013-12-12 The rise and rationalization of the industrial phosphates industry have gone hand in hand with the development and maturation of technologies to purify phosphoric acid In the 1960s and 70s driven by the exponential sales growth of the detergent builder sodium tripolyphosphate chemical producers raced to develop processes that would provide a sufficiently pure phosphoric acid feedstock for manufacture to undercut thermal phosphoric acid made from phosphorus As environmental and political pressure led to a collapse in demand for sodium tripolyphosphate in the 1990s the commercial pressures to rationalize at plant and corporate levels rose such that only the fittest survived **Phosphoric Acid Purification Uses Technology and Economics** the first and only book of its kind to be written on this topic covers the development of purification technologies for phosphoric acid especially solvent extraction describing the more successful processes and setting this period in the historical context of the last 350 years Individual chapters are devoted to the key derivative products which are still undergoing active development as well as to sustainability and how to approach the commissioning of these plants The text is aimed at students of chemistry chemical engineering business and industrial history and to new entrants to the industry **Industrial Chemical Process Analysis and Design** Mariano Martín Martín, 2025-12-08 **Industrial Chemical Process Analysis and Design** Second Edition uses chemical engineering principles to explain the transformation of basic raw materials into major chemical products The book discusses traditional processes to create products like nitric acid sulphuric acid ammonia and methanol as well as more novel products like bioethanol and biodiesel In addition to providing full code and datasets for download detailed discussion of advanced in technology this edition also contains three new chapters Firstly covering polymers including H and L D PE PMMA PC biobased and full analysis of each including full code for modelling across popular software Secondly evaluating phosphoric acid production and fertilizers and Finally the third new chapter focuses on blast furnaces outlining not only the traditional technologies using C as reducing agent but also analysis of novel technologies using hydrogen This book will be a comprehensive guide to students and academics working with the latest techniques in process optimization at graduate level and above including some upper undergraduate researchers This book will also be very valuable for academics looking to teach or lecture in chemical process engineering This book will also be a very useful resource for anyone within the process industry to introduce the analysis of novel technologies as well as the modelling examples including recent software such as python gProms or even Excel or Matlab to solve reactor modelling and units operation but also process simulators applied to typical chemical processes Integrates principles of chemical engineering unit operations and chemical reactor engineering to

understand process synthesis and analysis Includes historical perspectives and traces the improving efficiencies of commercially important chemical production processes Provides a systematic analysis of the processes building on thermodynamics kinetics mass and energy balances reactor engineering and unit operations Details different software packages to solve the examples from general purpose ones such as EXCEL or new ones like Python to specialized ones such as process simulators CHEMCAD or gProms Features worked examples and end of chapter problems with solutions to show the application of concepts discussed in the text
