The trauma treatment process is presented within the tri-phasic framework which is applicable across settings, disciplines, and various theoretical orientations. Each chapter also provides experiential activities that link the chapter content with clinician reflection and application of knowledge and skills which instructors and supervisors can easily utilize for evaluation and gatekeeping regarding a student's mastery of the content. An ideal resource for graduate-level faculty and supervisors, this book offers a versatile application for mental health-related fields including counseling psychology, social work, school counseling, substance abuse, and marriage and family therapy. Designed for students and professional clinicians, this groundbreaking text fills an important education and training gap by providing a comprehensive and enlightening presentation of trauma work while also emphasizing the clinician's growth in self-awareness and professional development.

The Somatic Internal Family Systems Therapy Workbook Susan McConnell, 2025-01-07. The companion workbook to *Somatic Internal Family Systems Therapy*, a practical guide to the 5 pillars of embodied IFS for trauma therapists. Somatic Experiencing practitioners and mental health healers. With embodied exercises, foundational knowledge, and practical guidance. The *Somatic Internal Family Systems Therapy Workbook* shows therapists and clinicians how to embody the five practices of Somatic IFS: somatic awareness, conscious breathing, radical resonance, mindful movement, and attuned touch. Each works together to facilitate trauma healing with clients and build embodied safety, integrate unresolved harm, and develop the ability to name, process, and understand emotional and somatic sensations. The workbook opens by inviting the therapist to explore their own Internal System, offering an embodied approach to experiencing the model. Chapter 1 explores and explains foundational concepts like somatics, embodiment, Parts, Self, and the cultural influences that shape and shift our embodied experiences. Chapters 2-6 move into theoretical grounding, clinical applications, and practical exercises for each of the five principles. They offer tools to: Develop clients' ability to name, describe, and convey sensations; Recognize and track for signs of client overwhelm; Work with Parts that fear body awareness; Understand the purpose and clinical benefits of conscious breathing; Restore the Embodied Self; Explore therapeutic shifts from doing to being with clients; Heal attachment wounds; Integrate mindful movement into healing developmental trauma; Understand and practice attuned touch. Each practice is designed to be used whenever it will be of benefit; the tools and exercises are non-linear and adaptable and aren't limited by a prescriptive sequence. The workbook also explores links between current psychotherapeutic practice and ancient healing modalities, grounding SIFS in a larger web of effective somatic trauma healing and embodiment approaches.
