Research Methods In Human Rights A Handbook:

Research Methods in Human Rights Bård A. Andreassen, Claire Methven O'Brien, Hans-Otto Sano, 2024-05-02 In this thoroughly revised second edition editors Bård A. Research Methods for International Human Rights Law Damian Gonzalez-Salzberg, Loveday Hodson, 2019-06-13 The study and teaching of international human rights law is dominated by the doctrinal method. A wealth of alternative approaches exists but they tend to be discussed in isolation from one another. This collection focuses on cross-theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field. As such it provides a coherent, accessible and diverse account of key theories and methods. A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific research methods to individual case studies. By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method. Furthermore, since every contribution follows the same uniform structure, this allows for fruitful comparison between different approaches to the study of our discipline
