**Proceedings of the IEEE Workshop on Mathematical Methods in Biomedical Image Analysis** ,2001 SAR Image Analysis, Modeling and Techniques ,1999 Current Approaches to Metaphor Analysis in Discourse Ignasi Navarro i Ferrando,2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification analysis and interpretation of metaphor across communication channels situational contexts genres and social spheres It reflects three foremost trends of present metaphor research namely the communicative approach the cognitive modelling approach and the multimodality approach These trends are considered as areas of research emerging on the ground of the Conceptual Metaphor Theory initiated by Lakoff The book intends to show their concomitances as well as mark their diversifying paths The aim is to bring about and make apparent the many connections among assumingly different trends stemming from CMT Whereas discrepancies between communicative and conceptual perspectives might seem irredeemable the book emphasizes and claims that the background framework of CMT provides a solid foundation for collaboration and mutual influence Consequently the analysis of metaphor usage in context may provide insights for cognitive modelling proposals The analysis of cognitive configuration of conceptual domains may in turn illuminate our understanding of communicative decisions in discourse The integration of multimodal metaphor analysis puts forward the idea that diverse modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances The various subject areas and methodologies illuminate the scene of current research in the field The poignant contributions open far reaching avenues into the realm of human thought and discourse Novel Applications of Intelligent Systems Mincho Hadjiski,Nikola

Kasabov, Dimitar Filev, Vladimir Jotsov, 2016-01-27 In this carefully edited book some selected results of theoretical and applied research in the field of broadly perceived intelligent systems are presented. The problems vary from industrial to web and problem independent applications. All this is united under the slogan "Intelligent systems conquer the world". The book brings together innovation projects with analytical research, invention, retrieval and processing of knowledge and logical applications in technology. This book is aiming to a wide circle of readers and particularly to the young generation of IT/ICT experts who will build the next generations of intelligent systems.

**Technology of Adhesives and Wood-Based Panels** Manfred Dunky, 2025-07-29 The book provides essential insights into the critical role of adhesive bonding in maximizing the value of wood products, equipping both students and industry professionals with the knowledge necessary to enhance production processes and improve product performance. Adhesive bonding of wood is a key factor in the efficient utilization of wood for the production of value added wood products such as wood based panels. The production of wood based panels requires high performance bonds between wood adherends and the properties of these wooden products are largely determined by the type and performance of the adhesive used. *Technology of Adhesives and Wood Based Panels* comprehensively covers wood based panels focusing on the technologies behind their raw materials and their production. Journey through the production process starting with the raw materials then application of adhesives onto the wood's surfaces, pressing the mat to the board and curing or solidifying the adhesive. Finally, this journey will culminate in an investigation of the properties of the bondline in wood based panels. This volume explores important concepts including the influence of wood materials and surface on wood bonding, the performance of wood based panels, the production technology of panels and the behavior of adhesives when applied to wood surfaces, making it a valuable resource to industry professionals and students alike. Readers will find that this book introduces wood adhesives and their chemistry and applications. Comprehensively covers the technology of wood based panels. Explores connections for properties and performance between adhesives and bonded products. Provides recent developments in wood adhesives and wood based panels. Audience: Engineers, chemists, scientists, researchers, students, production managers and technologists in the wood, wood based panel and adhesive industries.

*Machine Learning in Clinical Neuroscience* Victor E. Staartjes, Luca Regli, Carlo Serra, 2021-12-03 This book bridges the gap between data scientists and clinicians by introducing all relevant aspects of machine learning in an accessible way and will certainly foster new and serendipitous applications of machine learning in the clinical neurosciences. Building from the ground up by communicating the foundational knowledge and intuitions first before progressing to more advanced and specific topics, the book is well suited even for clinicians without prior machine learning experience. Authored by a wide array of experienced

global machine learning groups the book is aimed at clinicians who are interested in mastering the basics of machine learning and who wish to get started with their own machine learning research The volume is structured in two major parts The first uniquely introduces all major concepts in clinical machine learning from the ground up and includes step by step instructions on how to correctly develop and validate clinical prediction models It also includes methodological and conceptual foundations of other applications of machine learning in clinical neuroscience such as applications of machine learning to neuroimaging natural language processing and time series analysis The second part provides an overview of some state of the art applications of these methodologies The Machine Intelligence in Clinical Neuroscience MICN Laboratory at the Department of Neurosurgery of the University Hospital Zurich studies clinical applications of machine intelligence to improve patient care in clinical neuroscience The group focuses on diagnostic prognostic and predictive analytics that aid in decision making by increasing objectivity and transparency to patients Other major interests of our group members are in medical imaging and intraoperative applications of machine vision
