The Public Archaeology of Treasure Howard Williams, Samuel Clague, Peter Reavill, 2022-09-01 Select proceedings of the 5th University of Chester Archaeology Student Conference 31 January 2020 reflect on the shifting and conflicting meanings values and significances for treasure in archaeology s public engagements interactions and manifestations *The Oxford Handbook of Public Archaeology* Robin Skeates, Carol McDavid, John Carman, 2012-01-05 The Oxford Handbook of Public Archaeology seeks to reappraise the place of archaeology in the contemporary world by providing a series of essays that critically engage with both old and current debates in the field of public archaeology Divided into four distinct sections and drawing across disciplines in this dynamic field the volume aims to evaluate the range of research strategies and methods used in archaeological heritage and museum studies identify and contribute to key contemporary debates critically explore the history of archaeological resource management and question the fundamental principles and practices through which the archaeological past is understood and used today **Competing Values in Archaeological Heritage** Stuart Campbell, Liz White, Suzie Thomas, 2018-09-22 Archaeological heritage legislation aims to ensure the best possible protection for the archaeological heritage yet it remains the case that legislation can remain ineffective through other practical considerations Some consideration may be legal or procedural such as difficulties in enforcing legislation or in preventing crimes or damage or archaeological monuments However other problems may be less obvious and harder to address and require solutions which go much further than the simple application of the law The aim of this volume is to address several issues surrounding the management of archaeological heritage comparing and contrasting which laws work and which ones do not and ignoring other issues which might effectively present the transplantation of an ideal system to another country or political climate Or the cultural attitudes which might prevent a law working in the legal system for which it was designed The contributions are from various international jurisdictions and address a variety of subjects from the protection of archaeological monuments to dealing with and controlling chance finds made by members of the public Transnational Crime Valsamis Mitsilegas, Saskia Hufnagel, Anton Moiseienko, Shi Yanan, Liu Mingxiang, 2018-10-09 This volume offers a diverse set of perspectives on transnational crime Providing a wide ranging overview of the legal and policy issues that arise in connection with various forms of transnational crime the authors outline the criminal justice responses adopted across different jurisdictions Including contributions from high profile Chinese and European academics and practitioners across a variety of disciplines and methodological backgrounds the authors address some of the hitherto underexplored issues related to transnational crime These range from trafficking in cultural objects derived from illicit metal detecting and metal detecting tourism in China to the European approaches to criminalising the denial of historical truth The central theme of the book is that useful lessons can be drawn from each other s experiences and that a cross fertilisation of domestic approaches to transnational crime is essential to effective cooperation This book will be of use to students and academics of comparative

criminal justice and anyone interested in transnational crime *Coinage in the Northumbrian Landscape and Economy, C.575-c.867* Tony Abramson,2018 This book presents the author's digitization of Pirie's corpus of 9th century Northumbrian stycas This database enhanced by data from elsewhere is compared by location with the artefactual database known as VASLE created at the University of York 2008 to demonstrate that the co-occurrence of coins and portable artefacts defines monetary evolution in Northumbria Additionally the author presents a new periodization and reveals the previously disparaged gold shillings of York to have been issued by Bishop Paulinus a disruptive finding chronologically with wider consequences Northumbria benefited increasingly both monetarily and fiscally as the face value of coins fell Other conclusions include the idea that Northumbrian coin production was erratic that the Yorkshire Wolds were more highly monetized than the surrounding lowlands indicating a more enterprising culture that styca hoards represent episcopal expropriations and that there were significant changes in settlement and economy in the central lowlands This work demonstrates that monetization reflected northern independence innovation and enterprise Back cover page 4 of cover

Investigating Online Heritage Crime Damien Huffer, Evie Handby, 2025-12-01 From Reddit and YouTube to collector forums and live auctions the avenues through which cultural heritage can be bought and sold are rapidly growing alongside new digital technologies Considering anew the implications of this digital expansion for the online trafficking of cultural property and human remains Investigating Online Heritage Crime conducts an exacting examination of these relatively under-researched sites of heritage crime The chapters address how networks operate within and because of the interconnected social media and e-commerce landscape Through doing so this volume highlights where markets for online heritage are headed especially given the ever-prevalent adoption of AI and LLM Large Language Models technology that is profoundly reshaping all aspects of online life including licit and illicit commerce *Criminal Networks and Law Enforcement* Saskia Hufnagel, Anton Moiseienko, 2019-06-27 This collection presents an analysis of illicit networks and discusses implications for law enforcement and crime prevention The contributors draw on a range of methodologies and apply them to diverse international criminological settings from illegal fishing in the Indo-Pacific to money mule networks in the Netherlands Using a variety of examples the book elucidates how and why criminals form networks of cooperation and how they can be disrupted It is expected to be of interest to those who study criminology or criminal law as well as law enforcement practitioners
