*Finding Answers History! Religion! Science!* Pauline Schiappa, 2018-04-28 A mysterious and tremendous thing comes to reveal itself in the course of the lifetime of an earthly human So mysteriously confronted by it the earthly human becomes awed by this compelling human attribute The earthly human becomes so enraptured by it that he begins to consider it as a quality that defines and explains his human nature The earthly human desires to know the earthly human desires to understand that which his physical body sense experiences of

earthly reality The earthly human holds so much psychological and intellectual desire toward knowing it that he gives it a name truth How does the earthly human discover truth *Mathematical Theory of Democracy* Andranik Tangian, 2013-07-31 The mathematical theory of democracy deals with selection of representatives who make decisions on behalf of the whole society In this book the notion of representativeness is operationalized with the index of popularity the average percentage of the population whose opinion is represented on a number of issues and the index of universality the frequency of cases when the opinion of a majority is represented These indices are applied to evaluate and study the properties of single representatives e g president and representative bodies e g parliament magistrate cabinet jury coalition To bridge representative and direct democracy an election method is proposed that is based not on voting but on indexing candidates with respect to the electorate s political profile In addition societal and non societal applications are considered

Phenomena & Noumena Pauline Schiappa, 2018-04-10 Immanuel Kant 1724-1804 was an enlightenment philosopher who defined what is enlightenment For Kant enlightenment became humans dare to become wise Kant wrote many treatises based upon his minds ideas of humans ability to reason a moral society Kant addressed social notion that human moral thought was a moral imperative toward acquiring a worthy society Kant wrote a treatise on Noumena This book becomes a contemporary treatise relating earthly realities phenomena to the human minds innately known Noumena **The Soils of the Philippines** Rodelio B. Carating, Raymundo G. Galanta, Clarita D. Bacatio, 2014-04-23 The first soil survey in the Philippines was done by Mr Clarence Dorsey an American soil scientist in the province of Batangas in 1903 The Soils of the Philippines however is the first comprehensive summary of more than a century of soil survey work in this country It integrates the soil concepts of the reconnaissance soil survey results which commenced as early as 1934 and continued until the mid 1960s with the semi detailed soil surveys that continue to this day The result is the first ever genetic key for classifying Philippine soils at soil series level thus making it possible for any newcomers to the soil survey field to confidently produce their own soil map at a more detailed map scale to suit the project requirements This book brings together discussions on soils and soil mapping units and up to date international techniques and technologies It makes soils relevant to current political realities and national issues As soil survey moves from a reductionist agricultural development planning tool to a more holistic and integrated approach to enable us to understand our dynamic and complex environment The Soils of the Philippines will be the only source of authoritative and updated data on soil resources for macro level resource management planning for decades to come With a vanishing breed of experienced soil surveyors not only in the Philippines but also worldwide it may remain the only book on Philippine soils for the next hundred years or more Since soils follow a geological and not a human time frame the contents of this volume will stay relevant for soil surveyors even in a fast changing world As the country leaps from an agricultural economy towards modernization and a more diversified economic base some of the soil series in the Philippines for example the Guadalupe series underlying the skyscrapers of Makati City

are becoming extinct as a result of urban development Therefore this book serves as the repository for the soils that we possess the soils that have been lost through decades of urbanization while at the same time it creates a soil classification system for the soils we are yet to discover
