disassociated from the probabilistic and statistical tools traditionally used to model it the market can be thought as real in a new sense of reality corresponding to the new sense of matter To bring this new and original perspective *The Medium of Contingency* builds on probability theory as first formalized by von Mises and Kolmogorov and later revisited by Shafer and Vovk It utilises the author s extensive experience in derivatives pricing technology and software as well as his work in the philosophy of contingency and contingent claims to propose a new philosophical interpretation of Brownian motion and of the Black Scholes Merton formula Then it completes the overturning of the traditional view of the market by arguing that there should be no difference ultimately between an underlying asset and the derivative written on it This book does not aim to change the market but the way we must think of it It is the author s conviction that there can be no philosophy of the market and consequently no thinking of it without a philosophy of contingent claims and of derivative pricing The book provides the missing piece which the philosophy of probability cannot provide alone Its scope however extends beyond the strict critique of financial mathematics as it also and perhaps most importantly delivers the author s definitive treatment of the philosophically prominent and recently much discussed notion of contingency [The Infra-World](#) Francois J.

Bonnet,2019-01-15 *Traversing philosophy and the human sciences literature cinema and the visual arts* this book maps out a history where all is chaos maelstrom and fog If perception and language objectivate the world if imagination structures it if knowledge orders it then how can we describe name or even apprehend that which comes to pass when language is absent when perception vacillates and when knowledge eludes us How can we say show or make known that which undermines and refutes the order of things the supposedly immutable real and the administration of the sensible This book takes us on a quest that traverses philosophy and the human sciences but also literature cinema and the visual arts Not content with analysing the ordering power of our representations in *The Infra World* Fran ois J Bonnet also interrogates the works of artists who have experienced and experimented with those moments when they crack open giving way to anguish and vertigo If perception is a sieve what can be said of that which slips through its net how does one speak of what escapes What remains of unqualified perceptions of vanishing sensations Where do the indescribable nocturnal fears hide the horrors lurking behind closed eyes What of the world beneath language and objectivated sensation What of the infra world [On Pyrrho and Time](#) Jean-Paul Martinon,2024-09-28 Today s understanding of time remains mostly Aristotelian and Newtonian Einsteinian time is what has been abstracted from the mundane realities of life and reduced to its measurement Any somatic psychological or other experience of time is deemed either irrelevant or secondary The history of the attempts to provide alternatives to time as measurement is infinite most of which focuses on understanding time as an inner temporal phenomenon for which a subject temporalizes him or herself through remembrance experience or anticipation including death Amidst this vast field one argument by an enigmatic figure in ancient Greek thought stands out for the way it abides by neither the conventional view that time is clock time nor that it is an inner temporal phenomenon Aenesidemus overlooked

way of apprehending time by qualifying it as similar to air To make sense of such an unusual statement it is necessary to reconsider what informs such an unusual idea Aenesidemus teacher was Pyrrho often dubbed the Greek Buddha who advocated for a non differential approach to reality one for which nothing is fixed or stable With this perspective in mind Aenesidemus idea then becomes clear time or air knows no differentiae whether that of the unit of measure or of the subject breathing it and sheltering from it Both are radically unstable While these ideas had no purchase for over 2000 years they can now be revealed in all their magnitude In the last 120 years we have indeed become aerial beings We no longer scuttle around on the ground floor below an unsuspected ocean of air We no longer aspire to shin a tree or scale a peak We have now made a habitation of the air Such a new dwelling has its own unique time a time that strangely does not agree with the abstracted and or calculated time that was formulated when we only had sundials and water clocks at our disposal Against time as measure and against time as inner temporal phenomenon comes time as total instability Can revisiting the few fragments that Pyrrho and his disciple left us help once again articulate our relation to time and give us a renewed sense of reality and who we are within it This monograph focuses on early Pyrrhonism as distinguished from the sceptical work of Sextus Empiricus Pali Buddhism as well as contemporary interpretations of time and reality in both science and philosophy

*Performance Research Methods* Liesbeth Groot Nibbelink, Laura Karreman, 2025-10-24 *Performance Research Methods* is the first comprehensive guide to contemporary methodologies in performance studies offering a clear and structured overview of the tools currently shaping research in theatre dance and performance While many volumes focus on individual methods this book uniquely surveys a range of approaches presenting their historical background analytical potential practical application and interdisciplinary relevance Designed with clarity and usability in mind each chapter follows a consistent structure introduction contextual framing practical application case study demonstration interdisciplinary expansion and suggestions for further reading This format enables readers to compare methods with ease and understand how each can be adapted to real world research Developed by scholars actively teaching these methods in graduate and undergraduate programs this hands on volume addresses a key gap in the field the lack of explicit accessible discussions of performance research methods Responding to the societal technological and ecological contexts of contemporary performance the book makes visible the knowledge practices that often remain confined to the classroom Accessible to students researchers and arts professionals alike this volume provides an essential resource for anyone looking to engage critically and creatively with performance in the twenty first century **The Order of Sounds** Francois J.

Bonnet, 2019-01-15 This study of the subtlety complexity and variety of modes of hearing maps out a sonorous archipelago a heterogeneous set of shifting sonic territories shaped by the vicissitudes of desire and discourse Profoundly intimate yet immediately giving onto distant spaces both an organ of fear and an echo chamber of anticipated pleasures an uncontrollable flow subject to unconscious selection and augmentation the subtlety complexity and variety of modes of hearing has meant

that sound has rarely received the same philosophical attention as the visual In *The Order of Sounds* François J Bonnet makes a compelling case for the irreducible heterogeneity of sound navigating between the physical models constructed by psychophysics and refined through recording technologies and the synthetic production of what is heard From primitive vigilance and sonic mythologies to digital sampling and sound installations he examines the ways in which we make sound speak to us in an analysis of listening as a plurivocal phenomenon drawing on Foucault Deleuze and Guattari Barthes Nancy Adorno and de Certeau and experimental pioneers such as Tesla Bell and Raudive Stringent critiques of the soundscape and reduced listening demonstrate that univocal ontologies of sound are always partial and politicized for listening is always a selective fetishism a hallucination of sound filtered by desire and convention territorialized by discourse and its authorities Bonnet proposes neither a disciplined listening that targets sound itself nor an ocean of sound in which we might lose ourselves but instead maps out a sonorous archipelago a heterogeneous set of shifting sonic territories shaped and aggregated by the vicissitudes of desire and discourse

**When Site Lost the Plot** Robin Mackay, 2015-04-03 This collection charts some of the ways in which site continues to be a concern for contemporary practice and introduces the concept of plot as an alternative The critical concept of site specificity once seemed to harbour the potential for disruption But site specific work has become increasingly assimilated into the capitalist logic of regeneration and value creation The materialist critique of the art object has been shortcircuited by the franchised idiosyncrasies of international nomad fl neur's And on a planet whose entire surface is mapped and apped the concept of site itself becomes ever more problematic How can we do justice to the particularity of local sites while unearthing their material conditions What do a contemporary geo philosophy and the historical legacy of site specific art have to offer each other Can we develop methods for the controlled unpacking of the local into the global avoiding trivial reconciliations between local sites and their global conditions When *Site Lost the Plot* charts some of the ways in which site continues to be a concern for contemporary practice and introduces the concept of plot as an alternative approach Alongside artists discussing their practice and their approach to site and plot contributors from various disciplines introduce concepts from cartography mathematics film fiction design and philosophy

**The Medium of Contingency** Robin Mackay,2015-09-04 An unprecedented meeting of philosophical thought financial markets and the art world Why has the concept of contingency taken on a marked importance both in contemporary philosophy and in contemporary art practice And if this simultaneity derives from parallel problems met within the two different fields what are their common roots Beyond acknowledging the contingent nature of tradition institutions and practices recent speculative philosophies of absolute contingency demand a radical revision of the ways in which we conceive of our interaction with unknowable materialities and pose a challenge to both probabilistic management and process driven affirmation of contingency In an unprecedented meeting of philosophical thought financial markets and the art world The Medium of Contingency explores how works of art write contingency into the present and are in turn written by the contingency of their materials and how these exchanges interact with other markets From the mathematical instruments used to value financial derivatives to the nature of literary creation from the market making role of the curator to the chemistry of openness the contributors to this lively discussion draw out the startling consequences of a new figure of thought

**Final Machine** Amanda Beech,2013 This book focuses on Amanda

Beech's *Final Machine* (2013) is a video work in three parts which interrogates the force of images in the context of contingency. Collapsing detective style prose, laconic oracular visioning and dogmatic mantra, the work acts as a treatise on the image, politics and art itself. A foreword by Robin Mackay and new essays by Reza Negarestani and Bridget Crone interpret and surround this work, extending it to politics, fiction and philosophy, and weaving these reflections through Beech's wider practice.

Simulation, Exercise, Operations Robin Mackay, 2015-04-03

Collection of interventions on the status of the moving image in an age of advanced simulation, exploring the contemporary links between power, simulation and warfare. This collection of wide-ranging interventions and discussions on the status of the moving image in an age of advanced simulation explores the contemporary links between power, simulation and warfare. Today, technological simulation has become an integral part of military training and operations, and at the same time, media spectacle, often enabled by the same technologies, has become integrated with military power. Trained in virtual environments, army personnel are increasingly enhanced by augmented reality technologies that bring combat into conformity with its simulation. Equally, the seductions of media and entertainment have become crucial weapons for information dominance. At the same time, as the infosphere demands that war takes on the properties of a game, hyper-realistic videogames evolved from military technology become a kind of virtual distributed training camp, as the lines between simulation and action, combatant and civilian become blurred. Based on a round table discussion prompted by the work of artist John Gerrard, *Simulation Exercise Operations* assembles thinkers from philosophy, media and military theory to examine the powers of simulation in the contemporary world.
