A Complete Earthquake Resistant Design of Four-Story Regular Office Building for Pakistan Region Faheem A. Gul, 2022-08-25

The overall objective of this work program is to enhance the awareness of the public against vulnerability of upcoming earthquakes. The specific objective of this work is to make our students capable to design a regular building independently. The above mentioned specific goal is achieved with the help of following three tasks defining the scope of current work: i) To calculate the external stability checks problem ii) To design the superstructure of the building project by using SAP Structure analysis program software in order to create and analyze FEM Finite Element Model. The analysis results will be used for the drawings of structural members of the building iii) To Design the substructure of the building project by using SAFE software. The analysis results of the building foundation will be used for the structural drawings of isolated footings.
