The Oxford Handbook of Social Media and Music Learning Janice L. Waldron, Stephanie Horsley, Kari K. Veblen, 2020-09-23 The rapid pace of technological change over the last decade particularly the rise of social media has deeply affected the ways in which we interact as individuals in groups and among

institutions to the point that it is difficult to grasp what it would be like to lose access to this everyday aspect of modern life. The Oxford Handbook of Social Media and Music Learning investigates the ways in which social media is now firmly engrained in all aspects of music education providing fascinating insights into the ways in which social media musical participation and musical learning are increasingly entwined. In five sections of newly commissioned chapters a refreshing mix of junior and senior scholars tackle questions concerning the potential for formal and informal musical learning in a networked society. Beginning with an overview of community identity and the new musical self through social media scholars explore intersections between digital musical and social constructs including the vernacular of born digital performance, musical identity and projection and the expanding definition of musical empowerment. The fifth section brings this handbook to full practical fruition featuring firsthand accounts of digital musicians, students and teachers in the field. The Oxford Handbook of Social Media and Music Learning opens up an international discussion of what it means to be a musical community member in an age of technologically mediated relationships that break down the limits of geographical, cultural, political and economic place.

Mediamaker Handbook, *The Critical Media Literacy Guide*
Douglas Kellner, Jeff Share, 2019-05-20

Over half the world's population is now online, interconnected through a globally networked media and consumer society. The convergence of information media and technology has created the predominant ecosystem of our time. Yet most educational institutions are still teaching what and how they have for centuries and are thus increasingly out of date and out of touch with our current needs.

The Critical Media Literacy Guide: Engaging Media and Transforming Education provides a theoretical framework and practical applications for educators and teacher education programs to transform education by putting critical media literacy into action in classrooms with students from kindergarten to university. Douglas Kellner and Jeff Share lay out the evolution of thinking and development of media and cultural studies from the Frankfurt School to current intersectional theories about information and power that highlight the importance of race, gender, class, and sexuality. They provide insightful and accessible entry into theorizing education and information communication technologies through linking the politics of representation with critical pedagogy. The increase in fake news, alternative facts, bots, and trolls challenge our abilities to judge credibility and recognize bias. Kellner and Share present a critical lens and strategies to contextualize and analyze the dominant ideologies going viral across social media platforms and disseminated globally from enormous transnational corporations.

The Critical Media Literacy Guide is a powerful resource to analyze and challenge representations and narratives of multiple forms of identity, privilege, and oppression. Since the struggle for social justice and democracy requires new theories and pedagogies to maneuver the constantly changing terrain, this book is essential for all educators.
