### Abstract

Decisions related to textbook selection and evaluation are of great importance. The purpose of this study is to evaluate the three English language textbooks currently used at high schools in Iran from the high school English teachers' point of view.

For this purpose, a 46-item questionnaire was developed about the five sections of the textbooks (vocabulary, reading, grammar, language functions, and pronunciation practice), their physical make-up, and practical concerns. Fifty high school teachers with more than five years of teaching experience were asked to reflect on the questions by checking one of the four options included.

The results indicated that the textbooks are not acceptable from the teachers' point of view considering their five sections, their physical make-up, and some practical concerns.

### 1. Introduction

It is a fact that selecting and evaluating textbooks in EFL context is of utmost importance. However in Iran, there is limited research conducted to evaluate the textbooks that are already in use or those that are intended for use in future. In most of these studies, the researchers have themselves evaluated different textbooks by means of the checklists and questionnaires suggested by other scholars (Aliakbari, 2004; Jahangard, 2007; Razmjoo, 2007; Azizfar, Koosha and Lotfi, 2010). However, the primary users of textbooks are the teachers. So a comprehensive evaluation can only be carried out while the teachers and their view points are also taken into consideration.

### 2. Literature Review

Textbooks play a pivotal role in language classrooms in all types of educational institutions - state schools, colleges, language schools - all over the world. According to Lamic (1999), that is why despite the development of new technologies that allow for higher quality teacher-generated materials, demand for textbooks continues to grow, and the publishing industry responds with new series and textbooks every year. According to Razmjoo (2007) many students working with a textbook feel secure and have a sense of progress and achievement. Cunningsworth (1995) also argues that textbooks are an effective resource for self-directed learning, an effective resource for presenting materials by the teachers, a source of ideas and activities, a reference source for students, a syllabus that reflects pre-determined learning objectives, and support for less experienced teachers who have yet to gain in confidence.

According to Daoud and Celce-Murcia (1979), information on textbook selection is useful since it is sometimes part of the ESL/EFL teacher's responsibility to select the textbook she/he will use in a given class. Such a decision should be made carefully and systematically, not arbitrarily. They add that even in countries where the choice of the textbook does not directly involve the teacher, teachers may be asked to submit reports on the usefulness of the textbooks they are already making use of. Several possible criteria and procedures for carrying out a sound selection of appropriate

Linguistics and Language Behavior Abstracts ,2009-04 Poznań Studies in Contemporary Linguistics ,2008 Evaluating Textbooks and Their Potential for EFL Learning and Teaching. A Case Study Saleem Arif,2020-04-27 Master s Thesis from the year 2020 in the subject Didactics for the subject English Miscellaneous grade 1 0 University of Duisburg Essen Department of Anglophone Studies language English abstract In contrast to the reality outside of school textbooks especially in the context of teaching English as a foreign language TEFL are still the most important medium for language learning purposes today However the academic evaluation of textbooks is surprisingly a rather neglected field of study Also the very few studies that evaluate an EFL textbook mostly only consider the technical dimension of analysis such as the theoretical perspective of EFL methodology Yet to gain a more holistic impression of a textbook one should also include the practical perspective of EFL teachers Therefore the present case study critically evaluates one exemplary textbook combining the theoretical perspective of EFL didactics and the practical perspective of EFL teachers The TEFL textbook chosen for this case study is titled English G21 A5 published by Cornelsen in 2010 It is designed for grade 9 at Gymnasium in Germany Taking Unit 1 of this textbook as an example this paper aims at examining the potential of this textbook for EFL learning and teaching The central question is whether the textbook meets the various requirements posed to a textbook including the numerous principles that are part of contemporary EFL methodology and central educational standards In the first part of the analysis chapter 4 the question is in how far the textbook meets the theoretical requirements of TEFL For the second part of the analysis chapter 5 a small survey was carried out conducting qualitative interviews with four different teachers Employing qualitative content analysis the survey intends to find out about the teachers opinion on the textbook focusing on the question how the teachers assess the value of the textbook for their teaching practice Prior to the analysis it is however necessary to elaborate on some theoretical background chapter 2 This involves describing the main paradigms of contemporary EFL methodology as well as illustrating relevant theoretical context in relation to the term textbook and textbook evaluation revealing central requirements EFL textbooks need to fulfil The aim of this twofold description is to develop a list of criteria section 2 2 4 that will be used as the foundation of the textbook evaluation The selected textbook will be introduced in more detail in chapter 3

**Expertise in EFL Textbook Evaluation** Mija Kim, 2010 This thesis reports on a study of expertise in English as a foreign language EFL textbook evaluation So far studies in the area of EFL textbook evaluation have focused on what evaluators should do rather than what they actually do However this thesis describes the procedures used in practice by a group of teacher evaluators in terms of what they focused on and their manner of doing so in their actual evaluation of an EFL textbook The study was conducted in the Korean high school setting where school teachers are required to choose from among the authorised EFL textbooks approved by the Ministry of Education The primary heuristic involved in the study was the concept of expertise The attempt was therefore made to distinguish between the textbook evaluation approach of the research subjects who were conceptualised as on the one hand expert evaluators and on the other those thought of as non experts Thus twelve Korean EFL school teachers were chosen to evaluate one of the authorised EFL textbooks and data gathered concerning their evaluations by means of concurrent verbalisation i e the research subjects were audio taped while providing think aloud accounts of their evaluation procedures A judgment group comprising a panel of personnel with distinguished records in the areas of textbook evaluation and production in the Korean context then examined the data from the evaluations and made judgements on their quality in terms of whether they were considered expert non expert or in between the two The transcripts of the evaluation session tapes were coded using a grounded approach in order to distinguish the features attaching to each of the three main categories of evaluators The analysis indicated that the expert evaluators evaluated at a much deeper level than the non experts as evinced by what they considered what their priorities were and the nature of the cognitive activities they used The study is seen to have pedagogic implications for both textbook development and teacher development as well as for the development of a research framework that bridges a current gap in textbook evaluation studies It is also seen as contributing to widening the potential for the application of an expertise perspective within applied linguistics in general 1991, □□□□□□ □□□□□□
