JSON at Work Tom Marrs, 2017-06-19 JSON is becoming the backbone for meaningful data interchange over the internet. This format is now supported by an entire ecosystem of standards, tools, and technologies for building truly elegant, useful, and efficient applications. With this hands-on guide, author and architect Tom Marrs shows you how to build enterprise-class applications and services by leveraging JSON tooling and message document design. JSON at Work provides application architects and developers with guidelines, best practices, and use cases along with lots of real-world examples and code samples. You'll start with a comprehensive JSON overview, explore the JSON ecosystem, and then dive into JSON's use in the enterprise. Get acquainted with JSON basics and learn how to model JSON data. Learn how to use JSON with Node.js, Ruby on Rails, and Java. Structure JSON documents with JSON Schema to design and test APIs. Search the contents of JSON documents with JSON Search tools. Convert JSON documents to other data formats with JSON Transform tools. Compare JSON-based hypermedia formats including HAL and jsonapi. Leverage MongoDB to store and access JSON documents. Use Apache Kafka to exchange JSON-based messages between services.

Find the path, load data, and handle searches with REGEX. Work with JSON and non-JSON output. Build virtual generated columns and stored generated columns. Generate complex geometries using GeoJSON. Convert and manage data with JSON functions. Access JSON data collections and tables through MySQL Document Store.

Building Scalable and Smart Multimedia Applications on the Semantic Web Michael Hausenblas, 2009-05-04
Doctoral Thesis Dissertation from the year 2009 in the subject Business economics, Information Management, grade 1.0

University of Graz language English abstract The Semantic Web has become reality over the past couple of years While certain practical topics such as interoperability etc have at least partially been addressed scalability and expressivity issues regarding the utilisation of multimedia metadata on the Semantic Web are still widely neglected However existing Web 2 0 applications handling millions of multimedia assets are starting to take advantage of Semantic Web technologies This work contributes to design decisions regarding scalable and smart multimedia applications on the Semantic Web Based on an analysis of practical issues stemming from diverse projects and activities the author has participated in over the past four years three areas have been identified namely i performance and scalability issues on the data access level ii the effective and efficient representation of multimedia content descriptions and iii the deployment of multimedia metadata on the Semantic Web The three research areas have as its common base the trade off between expressivity and scalability We present our findings regarding scalable yet expressive Semantic Web multimedia applications in a number of practical settings and discuss future directions such as interlinking multimedia
