fundamentals for teaching empirical software engineering addressing more cross cutting aspects from theorizing and teaching research designs to measurement and quantitative data analysis In the third part general experiences and personal reflections from teaching empirical software engineering in different settings are shared Finally the fourth part contains a number of carefully selected research methods presented through an educational lens Next to the chapter contributions themselves that provide a more theoretical perspective and practical advice readers will find additional material in the form of for example slide sets and tools in an online material section The book mainly targets three different audiences 1 educators teaching empirical software engineering to undergraduate postgraduate or doctoral students 2 professional trainers teaching the basic concepts of empirical software engineering to software professionals and 3 students and trainees attending such courses
