Observing the Caldwell Objects David Ratledge,2012-12-06 Background A new collection of deep sky targets for the modern amateur astronomer was long overdue The traditional catalogue of deep sky objects i e that produced by Messier over 200 years ago has become a victim of its own success Those objects have now become far too well known over viewed over imaged and over published More importantly they have often resulted in more interesting objects being totally overlooked The logic behind the compilation of Messier s objects was nothing more profound than that they might be confused for a comet There must be a better way to choose the best deep sky objects for the modern era It was time for a fresh approach Enter Patrick Moore As an active observer for over half a century and the last 40 years of which as presenter

ofBBC TV's Sky at Night he has travelled all over the World and never missed the opportunity to observe the skies This has given him an in depth practical knowledge of deep sky objects in both northern and southern hemispheres Deep Sky,1989 *Star Maps* Nick Kanas,2012-06-05 Until the publication of the first edition of Star Maps books were either general histories of astronomy using examples of antiquarian celestial maps as illustrations or catalogs of celestial atlases that failed to trace the flow of sky map development over time The second edition focuses on the development of contemporary views of the heavens and advances in map making It captures the beauty and awe of the heavens through images from antiquarian celestial prints and star atlases This book uniquely combines a number of features 1 the history of celestial cartography is traced from ancient to modern times 2 this development is integrated with contemporary cosmological systems 3 the artistry of sky maps is shown using beautiful color images from actual celestial atlases and prints 4 each illustration is accompanied by a legend explaining what is being shown and 5 the text is written for the lay reader based on the author's experience with writing articles for amateur astronomy and map collector magazines This updated second edition of Star Maps contains over 50 new pages of text and 44 new images 16 in color including completely new sections on celestial frontispieces deep sky objects playing card maps additional cartographers and modern computerized star maps There is also expanded material about celestial globes volvelles telescopes and planets and asteroids **Canadian Books in Print** ,2003 **Canadian Books in Print. Author and Title Index** ,1975 **Wil Tirion's Bright Star Atlas 2000.0** Wil Tirion,Brian Skiff,1990 **Sky Catalogue 2000.0: Stars to magnitude 8.0** Alan Hirshfeld,Roger W. Sinnott,1982
