Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region [Handbook of Prevention and Alzheimer's Disease](#) Yue Leng, J. Wesson Ashford, Dharma Singh Khalsa, 2024-02-15 It is almost 120 years since Alzheimer's disease AD was first reported and the concept of modifiable risk factors associated with the disease has been present from the outset Thus the idea of preventing AD is not new with reference to strategies noted as early as the 1990s This subfield of AD research has matured in recent years with the number

of modifiable risk factors the AD preventome rising from the 7 initially identified to the current 12 with an estimated contribution to dementia cases worldwide of about 40% This book the Handbook of Prevention and Alzheimer s Disease introduces physicians scientists and other stakeholders to this subfield of AD research It investigates the AD preventome which will continue to expand as the understanding of new factors and related biomarkers is refined Optimizing this preventome leads to an improvement in overall brain health an outcome which reduces the risk of developing AD and improves quality of life The book goes on to examine other domains of prevention from vascular risk factors to social engagement and from sleep health to spirituality If the journey to end AD can be likened to a long and arduous challenge understanding every possible part of the overall toolkit of approaches for disease prevention and intervention is essential Together with its companion volume on intervention the book provides a comprehensive overview of strategies for tackling Alzheimer s disease and will be of interest to all those working in the field Cover illustration White matter tracts showing sex differences in connectivity in men versus women as a function of increasing body mass index Reprinted with permission from Rahmani F Wang Q McKay NS Keefe S Hantler N Hornbeck R Wang Y Hassenstab J Schindler S Xiong C Morris JC Benzinger TLS Raji CA Sex Specific Patterns of Body Mass Index Relationship with White Matter Connectivity J Alzheimers Dis 2022 86 4 1831 1848 doi 10 3233 JAD 215329 PMID 35180116 PMCID PMC9108572
