

# Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the 2024 Summer Term of Cooling Theory. These are peer-reviewed and give insights on problems for all of the cooling game. Some are the proceedings with results on the lecture, the other contributions to Cooling Theory and the book of Hoffman and Peter Friedmann at the University of Oxford. I also used several other sources for historical research such as Part II course book of Cambridge on Cooling Theory and Thermodynamics given by Professor John Kestin, and the other course notes from a Cambridge book on Subatomic Thermodynamics course given by Professor Eric Lifshitz. I also included some more recent books such as 2023 course Applied Math for the Phys. Department. The last version of the notes is based on Mark Hupfer's course notes "Thermodynamics".

All credits go to those who did my best.
