Design and Implementation of SMPS Circuit Using PWM Concepts, Switched Mode Power Supply SMPS is the most prevailing architecture for DC power supply in modern systems primarily for its capability to handle variable loads Apart from efficiency the size and weight of the power supplies is becoming a great area of concern for the Power Supply Designers In this thesis an AC to DC converter SMPS circuit having a power MOSFET for switching operation and a PWM based Feedback circuit for driving the switching of the MOSFET is designed and simulated in NI MULTISIM circuit design environment Further the same circuit is Hardware implemented and tested using NI ELVIS Suite In this design the line voltage at 220V 50Hz is taken as input this voltage is stepped down rectified and passed through filter capacitor to give an unregulated DC voltage This unregulated voltage is chopped using a MOSFET switch driven by PWM feedback signal to control the output voltage level An Isolation Transformer is used to isolate the DC output from input supply The transformer output is again rectified by the high frequency Diode bridge rectifier and is filtered using a capacitor to give the regulated DC output A Voltage regulator is connected to give the precise voltage output The feedback network generates a high frequency PWM signal to drive the MOSFET switch The dc voltage at the output depends on the width of the switching pulse The pulse width is varied with the changes in the DC output voltage level this change in the pulse width cancels the output voltage change and the SMPS output remains constant irrespective of load variations

Switched Mode Power Supplies H. W. Whittington, Brian W. Flynn, Donald Ewen Macpherson, 1992 Switched mode power supplies are now established as an industry standard method of providing power to many types of electronic equipment This book provides thorough up to date coverage of all aspects of switched mode power supply technology

Principles of Power Integrity for PDN Design--Simplified Larry D. Smith, Eric Bogatin, 2017-04-06 Consistently Design PDNs That Deliver Reliable Performance at the Right Cost Too often PDN designs work inconsistently and techniques that work in some scenarios seem to fail inexplicably in others This book explains why and presents realistic processes for getting PDN designs right in any new product Drawing on 60 years of signal and power integrity experience Larry Smith and Eric Bogatin show how to manage noise and electrical performance and complement intuition with analysis to balance cost performance risk and schedule Throughout they distill the essence of complex real world problems quantify core principles via approximation and apply them to specific examples For easy usage dozens of key concepts and observations are highlighted as tips and listed in quick chapter ending summaries Coverage includes A practical start to finish approach to consistently meeting PDN performance goals Understanding how signals interact with interconnects Identifying root causes of common problems so you can avoid them Leveraging analysis tools to efficiently explore design space and optimize tradeoffs Analyzing impedance related properties of series and parallel RLC circuits Measuring low impedance for components and entire PDN ecologies Predicting loop inductance from physical design features Reducing peak impedances from combinations of capacitors Understanding power and ground plane properties in the PDN interconnect Taming signal integrity problems when signals change return planes Reducing peak impedance created by on die capacitance and package lead inductance Controlling transient current waveform interactions with PDN features Simple spreadsheet based analysis techniques for quickly creating first pass designs This guide will be indispensable for all engineers involved in PDN design including product board and chip designers system hardware component and package engineers power supply designers SI and EMI engineers sales engineers and their managers **EDN, Electrical Design News** ,2007 [Automatic Control and Mechatronic Engineering III](#) Abdel-Hamid I.
