

Method Statement For Fire Alarm System Installation & Testing

Below is the method statement for the installation of fire alarm system which can be modified for different type of systems like HSSD or Vesda etc. The steps are very general and should be customized depending upon the project specific requirements, specifications and applicable NFPA or other standards.

Installation Procedure

All materials received at site shall be inspected and ensured that the materials are as per approved material submittal. Any discrepancies, damages etc. shall be notified and reported for further action. Material found not suitable for the project shall be removed from site immediately.

All the **Fire Alarm System** Outstations, Modules & Control Panels etc. shall be stored in an air conditioned place.

25 mm PVC Conduiting for concealed installation. For surface installation, FP200 cable will be clipped on the soffit on the slab in false ceiling and non-false ceiling areas.

The containment system for Fire Alarm system is being used wherever required and also near the Fire Alarm control panels.

Correct type of back boxes for all the outstations should be installed as per approved shop drawings / material submittals.

The mounting heights for the Junction boxes should be verified with approved shop drawings.

Containment System should be offered for QC verification prior to cabling works.

All the related documents like latest approved shop drawings and schematic etc. should be available with installation team.
