Exercises for Section 2.1: Statements

- 2.1 (a) A false statement.
 (b) A true statement.
 (c) Not a statement.
 (d) Not a statement (an open sentence). (e) Not a statement.
 (f) Not a statement (an open sentence). (g) Not a statement.
- 2.2 (a) A true statement since $A = \{3n - 2 : n \in \mathbb{N}\}$ and so $3 \cdot 9 - 2 = 25 \in A$.
 (b) A false statement. Starting with the 3rd term in D , each element is the sum of the two preceding terms. Therefore, all terms following 21 exceed 33 and so $33 \notin D$.
 (c) A false statement since $3 \cdot 8 - 2 = 22 \notin A$.
 (d) A true statement since every prime except 2 is odd.
 (e) A false statement since B and D consist only of integers. (f) A false statement since 53 is prime.
- 2.3 (a) False. \emptyset has no elements. (b) True.
 (c) True.
 (d) False. $\{\emptyset\}$ has \emptyset as its only element. (e) True.
 (f) False. 1 is not a set.
- 2.4 (a) $x = -2$ and $x = 3$.
 (b) All $x \in \mathbb{R}$ such that $x = -2$ and $x = 3$.
- 2.5 (a) $\{x \in \mathbb{Z} : x \geq 2\}$
 (b) $\{x \in \mathbb{Z} : x \leq 2\}$
- 2.6 (a) A can be any of the sets $\emptyset, \{1\}, \{2\}, \{1, 2\}$, that is, A is any subset of $\{1, 2, 4\}$ that does not contain 4.
 (b) A can be any of the sets $\{1, 4\}, \{2, 4\}, \{1, 2, 4\}, \{4\}$, that is, A is any subset of $\{1, 2, 4\}$ that contains 4.

Introduction to Mathematical Proofs Charles Roberts, 2009-06-24 Shows How to Read Write Mathematical Proofs Ideal Foundation for More Advanced Mathematics Courses Introduction to Mathematical Proofs A Transition facilitates a smooth transition from courses designed to develop computational skills and problem solving abilities to courses that emphasize theorem proving It helps students develop the skills necessary to write clear correct and concise proofs Unlike similar textbooks this one begins with logic since it is the underlying language of mathematics and the basis of reasoned arguments The text then discusses deductive mathematical systems and the systems of natural numbers integers rational numbers and real numbers It also covers elementary topics in set theory explores various properties of relations and functions and proves several theorems using induction The final chapters introduce the concept of cardinalities of sets and the concepts and proofs of real analysis and group theory In the appendix the author includes some basic guidelines to follow when writing proofs Written in a conversational style yet maintaining the proper level of mathematical rigor this accessible book teaches students to reason logically read proofs critically and write valid mathematical proofs It will prepare them to succeed in more advanced mathematics courses such as abstract algebra and geometry

Technometrics, 2004 *A Transition to Proof* Neil R. Nicholson, 2019-03-21 A Transition to Proof An Introduction to Advanced Mathematics describes writing proofs as a creative process There is a lot that goes into creating a mathematical proof before writing it Ample discussion of how to figure out the nuts and bolts of the proof takes place thought processes scratch work and ways to attack problems Readers will learn not just how to write mathematics but also how to do mathematics They will then learn to communicate mathematics effectively The text emphasizes the creativity intuition and correct mathematical exposition as it prepares students for courses beyond the calculus sequence The author urges readers to work to define their mathematical voices This is done with style tips and strict mathematical do's and don'ts which are presented in eye catching text boxes throughout the text The end result enables readers to fully understand the fundamentals of proof Features The text is aimed at transition courses preparing students to take analysis Promotes creativity intuition and accuracy in exposition The language of proof is established in the first two chapters which cover logic and set theory Includes chapters on cardinality and introductory topology

Solutions Manual for Advanced Mathematics John H. Saxon, 1997 **A Transition to Mathematics with Proofs** Michael J. Cullinane, 2013 Developed for the transition course for mathematics majors moving beyond the primarily procedural methods of their calculus courses toward a more abstract and conceptual environment found in more advanced courses A Transition to Mathematics with Proofs emphasizes mathematical rigor and helps students learn how to develop and write mathematical proofs The author takes great care to develop a text that is accessible and readable for students at all levels It addresses standard topics such as set theory number system logic

relations functions and induction in at a pace appropriate for a wide range of readers Throughout early chapters students gradually become aware of the need for rigor proof and precision and mathematical ideas are motivated through examples Proof techniques and strategies are thoroughly discussed and the underlying logic behind them is made transparent Each chapter section begins with a set of guided reading questions intended to help students to identify the most significant points made within the section Practice problems are embedded within chapters so that students can actively work with a key idea that has just been introduced Each chapter also includes a collection of problems ranging in level of difficulty which are perfect for in class discussion or homework assignments 2013 354 pages
