

## PHOBIAS

A phobia is an excessive and unexplained fear of a certain subject, place, or situation. You will experience extreme fear when faced with objects or phenomena that frighten or phobia you. Phobias are very common and difficult to get rid of. Some phobias can make it impossible for you to do anything, affecting daily life. In severe cases, the obsession will make you short of breath, increase blood pressure, chest pain, nausea, dizziness, or even your a life-threatening heart attack.

Usually, many people think that fear is the same as a phobia. However, fear is a normal reaction to a threat while a phobia leads to a fear response even when you're not in danger. Phobias can be associated with many different objects or situations, such as a fear of heights, flying, spiders, needles, or vomiting.

Phobias are chronic, a long-lasting disorder that is different from temporary feelings of fear, or short-term anxiety. As a result, this condition greatly affects the physical, psychological, and life of the patient. If you've experienced a dangerous event, like an insect bite, drowning, or being trapped in a confined space, you may be haunted. In some cases, people who have undergone psychological treatment or have suffered a brain injury can also suffer from phobias. You may also be obsessed with stress or experiencing negative life changes.

There are more than 100 different types of phobias, usually divided into 3 groups. The first is a social fear. Social phobia is a social anxiety disorder. People experiencing this type of phobia often have extreme anxiety about social situations such as answering the phone, making a phone call, or making a restaurant reservation. The root of this fear is often simple reactions or actions that cause them to isolate themselves. People with this phobia rarely go out or avoid appearing in public. When a person has experienced a negative event in public, socializing can be the biggest trauma for them.

The second is fear of crowded places. Crowd phobia is a fear of places or situations from which they cannot escape, or of open spaces. These people often avoid crowds, and
