## **Quantitative Methods In Construction Management And Design:**

**Quantitative Methods in Construction Management and Design** John Frank Woodward,1975-01-01 Project Planning, Scheduling, and Control in Construction Calin M. Popescu,Chotchai Charoenngam,1995-03-20 Critical Path Method CPM and Performance Evaluation and Review Technique PERT are widely recognized as the most effective methods of keeping large complex construction projects on schedule under budget and up to professional standards But these methods remain underused because they are poorly understood and due to a host of unfamiliar terms and applications may seem more complicated than they really are This encyclopedia brings together in one comprehensive volume all terms definitions and applications related to the time and cost management of construction projects While many of these terms refer to ancient and venerable building practices others have evolved quite recently and refer specifically to modern construction and management techniques Sources include hundreds of professional books trade journals and research publications as well as planning and scheduling software vendor literature The detailed glossary of all applicable terms includes across referenced listing of examples that describe real world applications for each term supplied An extensive bibliography covers all applicable books articles and periodicals available on project planning scheduling and control using CPM and related subjects This book is an important quick reference and desktop information resource for construction planners schedulers and controllers as well as civil engineers and project managers It is also the ultimate research tool for educators students or anyone who seek to improve their understanding of the management of modern construction projects

*Mixed Methods Research Design for the Built Environment* Julius Akotia,Bankole Osita Awuzie,Charles Egbu,2023-12-08 The application of mixed methods research design in the built environment discipline by students and academics has continued to grow exponentially However with no dedicated mixed methods research design textbook in this domain students have struggled to conduct research projects involving a mixed methods research design *Mixed Methods Research Design for the Built Environment* provides a useful research methodology resource for students academics and researchers across various disciplines in the built environment such as construction management and project management property and real estate management quantity surveying and commercial management building surveying building services engineering civil and geodetic engineering and other built environment disciplines The book can also be useful for students and academics outside the built environment knowledge domain This textbook offers practical and step by step guidance on how to apply mixed methods research design including an elucidation of the various philosophical and methodological underpinnings upon which the choice of a particular variant of the mixed methods research design is predicated It provides practical case examples and guidance on the processes involved to design and undertake mixed methods research the advantages and disadvantages of using mixed methods research and how multiple sources of qualitative and quantitative data can be combined and applied to carry out research projects

Advanced Research Methods in the Built Environment Andrew Knight,Les Ruddock,2009-03-16 This book provides a

bridge between the introductory research methods books and the discipline specific higher level texts Its unique feature is the coverage of the detailed process of research rather than the findings of research projects Chapter authors have been carefully selected by their expertise discipline and location to give an eclectic range of perspectives Particular care has been taken to balance positivist with interpretivist approaches throughout The authors focus is on the practical consequences of research philosophies strategies and techniques by using their own research and by evaluating the work of others Advanced Research Methods in the Built Environment addresses common topics raised by postgraduate level researchers rather than dealing with all aspects of the research process Issues covered range from the practicalities of producing a journal article to the role of theory in research The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research

**Proceedings of the 26th International Symposium on Advancement of Construction Management and Real Estate** Hongling Guo,Dongping Fang,Weisheng Lu,Yi Peng,2022-09-01 This book of CRIOCM 2021 26th International Conference on Advancement of Construction Management and Real Estate presents the latest developments in real estate and construction management around the globe The conference was organized by the Chinese Research Institute of Construction Management CRIOCM working in close collaboration with Tsinghua University Written by international academics and professionals the book discusses the latest achievements research findings and advances in frontier disciplines in the field of construction management and real estate Covering a wide range of topics including building information modeling big data geographic information systems housing policies management of infrastructure projects intelligent construction and smart city real estate finance and economics and urban planning and sustainability the discussions provide valuable insights into the implementation of advanced construction project management and real estate market in China and abroad The book offers an outstanding resource for academics and professionals

*Journal of the American Concrete Institute* American Concrete Institute,1977

**The Construction Industry in the Fourth Industrial Revolution** Clinton Aigbavboa,Wellington Thwala,2019-08-09 This book gathers papers from the 11th Construction Industry Development Board cidb Postgraduate Research Conference held on 28 30 July 2019 in Johannesburg South Africa The conference provided an essential forum for reviewing and generating knowledge on Construction 4 0 and consequently highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical to digital and digital to physical transformation The event addressed three broad themes Industrial production prefabrication 3 D printing and assembly offsite and advanced manufacturing Cyber physical systems actuators sensors IoT robots and cobots for repetitive and dangerous tasks and drones for mapping progress monitoring safety and quality inspections lifting moving and positioning and Technologies digital ecosystems digital platforms BIM video and laser scanning AI and cloud computing big data and data analytics reality

capture blockchain simulation virtual and augmented reality data standards and interoperability and vertical and horizontal integration Given its scope the book will be of interest to all construction industry and architectural professionals who want to learn about cutting edge technologies applied to construction *The DMG Bulletin* Design Methods Group,1972
