COMMON SAP SOLUTION ARCHITECT INTERVIEW QUESTIONS

- Are you familiar with the SAP product line?
- What are some of the most important skills for a Solution Architect to have?
- How do you determine the best way to implement a new system?

EXPAND +

Are you familiar with the SAP product line?

The interviewer may ask this question to assess your knowledge of the SAP product line and how it relates to their organization. Use your answer to highlight any experience you have with SAP products, including which ones you've used in the past and what your overall opinion is on them.

Example: *"I am familiar with the SAP product line, having worked with several of its solutions in my previous role as a solution architect. I found that SAP's ERP software was very useful for managing company-wide operations, but I also found that some of its other products were not as effective. For example, I found that while SAP CRM can be helpful for customer relationship management, it doesn't offer much functionality when compared to more robust tools like Salesforce."*
