Tacit Dimension Michael Polanyi:

The Tacit Dimension Michael Polanyi, 1967 I shall reconsider human knowledge by starting from the fact that we can know more than we can tell writes Michael Polanyi whose work paved the way for the likes of Thomas Kuhn and Karl Popper The Tacit Dimension argues that tacit knowledge tradition inherited practices implied values and prejudices is a crucial part of scientific knowledge From publisher s description **The Tacit Dimension of Knowledge** John Avellino, 2002

Reconsidering Michael Polanyi's Philosophy Stefania Ruzsits Jha, 2017-03-13 The chemist and philosopher Michael Polanyi 1891 1976 was one of the first twentieth century scientists to propose a program to resolve the internal conflict of the modern Enlightenment scientific detachment and moral nihilism with humanist values Stefania Jha s intellectual biography places Polanyi in the context of his time and culture analyzes his key philosophical ideas and explicates the application and at times misappropriation of his work Polanyi s method was not laid out in his published works and his vocabulary tends to make his writings difficult to understand By exposing the structure of his theory of tacit knowing and by tracing the growth of his thinking Jha shows how the various elements of his thought are integrated Through examination of his philosophical roots in Kant and the complexity of his evolving thought she counteracts the popular notion that Polanyi s philosophy stands apart from the western philosophic tradition Jha s deep analysis makes Polanyi s shift of focus from science to philosophy more intelligible his philosophy more approachable and the causes he championed such as the freedom of science and cultural freedom more understandable Applying his notion of tacit knowing in practical directions Jha seeks to bring the study of Polanyi s philosophy out of the specialists enclave and into such fields as ethics and clinical medicine

The tacit dimension, by michael polanyi Michael Polanyi, 1967 **The Tacit Dimension** Lara Schrijver, 2021 Within architecture tacit knowledge plays a substantial role both within the design process and its reception This book explores the tacit dimension of architecture in its aesthetic material cultural design based and reflexive understanding of what we build Much of architecture s knowledge resides beneath the surface in nonverbal instruments such as drawings and models that articulate the spatial imagination of the design process Tacit knowledge described in 1966 by Michael Polanyi as what we can know but cannot tell often denotes knowledge that escapes quantifiable dimensions of research Beginning in the studio where students are guided into becoming architects the book follows a path through the tacit knowledge present in models materials conceptual structures and the design process revealing how the tacit dimension leads to craftsmanship and the situated knowledge of architecture in the world Awareness of the tacit dimension helps to understand the many facets of the spaces we inhabit from the ideas of the architect to the more hidden assumptions of our cultures The Limits of Liberalism Mark T. Mitchell, 2018-11-30 In The Limits of Liberalism Mark T Mitchell argues that a rejection of tradition is both philosophically incoherent and politically harmful The Limits of Liberalism identifies why most modern thinkers have denied the essential role of tradition and explains how tradition can be restored to its proper place Mitchell demonstrates that the

rejection of tradition as an epistemic necessity has produced a false conception of the human person the liberal self which in turn has produced a false conception of freedom Together these false conceptions have facilitated both liberal cosmopolitanism and identity politics Mitchell uses the philosophies of Michael Oakeshott Alasdair MacIntyre and Michael Polanyi to construct a compelling argument for a reconstructed view of tradition and as a result a reconstructed view of freedom The Limits of Liberalism reveals that only by finding an alternative to the liberal self can we escape the incoherencies and pathologies inherent therein

Ignorant Cognition Selene Arfini, 2019-02-19 This book offers a comprehensive philosophical investigation of ignorance Using a set of cognitive tools and models it discusses features that can describe a state of ignorance if linked to a particular type of cognition affecting the agent's social behavior belief system and inferential capacity The author defines ignorance as a cognitive condition that can be either passively and unconsciously borne by an agent or actively nurtured by him or her and a condition that entails epistemic limitations which can be any lack of knowledge belief information or data that affect the agent's behavior belief system and inferential capacity The author subsequently describes the ephemeral nature of ignorance its tenacity in the development of human inferential and cognitive performance and the possibility of sharing ignorance among human agents within the social dimension By combining previous frameworks such as the naturalization of logic the eco cognitive perspective in philosophy and concepts from Peircean epistemology and adding original ideas derived from the author's own research and reflections the book develops a new cognitive framework to help understand the nature of ignorance and its influence on the human condition

Michael Polanyi Harry Prosch, 1986-10-15 Michael Polanyi was an eminent physical chemist economist and philosopher This book explains how the many diverse topics that concerned him belong together as essential elements in his effort to play physician to the sickness of the modern mind Using both published and unpublished writings Prosch critically evaluates Polanyi's efforts and examines the value of his work as philosophy The book contains a complete bibliography of Polanyi's humanistic publications and all of his earlier works

Christian Doctrine in the Light of Michael Polanyi's Theory of Personal Knowledge Joan Crewdson, 1994 This work aims to show how Michael Polanyi's theory of personal knowledge provides a framework of interpretation capable of making a theistic view of reality credible It explores the thesis that we live in an open and personal universe with humans as the highest product of the evolutionary process The nature of the personal must ultimately be understood in the light of what God is Such an understanding allows us to see God and creation as a single order of personal reality in which God is both transcendent and immanent This thesis is explored with particular reference to the doctrines of creation the Trinity the Incarnation and the Kingdom of God

McGrath,2001 A Scientific Theology is a ground breaking work of systematic theology in three volumes Nature Reality and Theory Written by one of the world s best known theologians these volumes together represent the most extended and systematic exploration of the relation between Christian theology and the natural sciences yet produced Thoroughly ecumenical in approach A Scientific Theology is a significant work for Catholic Orthodox Protestant and evangelical readers Each volume is marked throughout by a sustained and critical engagement with the history and philosophy of the natural sciences and by a passionate commitment to the legitimacy of theology as an academic discipline The three volumes together attempt to present an essentially linear argument from nature to theory so that questions of how reality is represented will be dealt with entirely in the final volume though preliminary discussions of aspects of reality are naturally included in this present volume The second volume in the series thus provides a detailed and thorough examination and defense of theological realism Its themes are set against the backdrop of radical changes in Western philosophy and theology resulting from the collapse of the Enlightenment project and the consequent fragmentation of intellectual discourse Engaging critically with writers such as George Lindbeck and John Milbank McGrath offers a sparkling and sophisticated affirmation of theological realism against its modern and postmodern critics His refutation of the claim that the rise of philosophical nonfoundationalism entails the abandoning of any form of realism is of particular importance as is his application of the highly influential form of critical realism developed by Roy Bhaskar Viewed as a whole Reality represents a sustained engagement with natural theology as the basis of a broader dialogue between the Christian tradition and other religious traditions Book jacket **Knowledge Management & Information Technology** Georg Hüttenegger,2009 Doctoral Thesis Dissertation from the year 2004 in the subject Computer Science Commercial Information Technology grade A Vienna University of Technology 120 entries in the bibliography language English abstract This thesis examines the relationship of Knowledge Management KM and Information Technology IT using a holistic view The first chapter presents definitions of knowledge and KM discusses related fields to KM and knowledge types argues what KM activities can be supported by IT examines areas of IT related to KM defines the focus of this thesis and presents interesting artifacts As areas that require flexibility creativity and learning are especially in need of KM this thesis concentrates on them The next chapter analyzes the goals of KM problems to be addressed by KM systems goals and problems of a university problems of existing KM systems and the requirements of a KM system that supports a KM initiative that addresses the mentioned problems and does not suffer from the described problems Following the identification of requirements for KM systems chapter 3 discusses important preconditions and foundations for KM and KM systems As a complete KM system can only be part of a complete and holistic KM initiative this examination presents indispensable issues for such KM initiatives and discusses the importance

The Crisis in Higher Education Marjorie Reeves,1988 Two-Way Mirrors Eugene Chen Eoyang,2007-10-05 In *Two Way Mirrors* Chen Eugene Eoyang engages in cross cultural study shedding light not only on the object of study but also on the subject conducting the study The book s leading metaphor is that of the shop window which is at once transparent allowing a view of the merchandise on display and reflective offering an image of the prospective shopper Eoyang shows the different and oppositional premises in Eastern and Western poetics juxtaposed not as contradictory but as complementary allowing for a mutual illumination of values He confronts the question of globalization and postmodernism bidirectionally from an Asian as well as a Western perspective Eoyang concludes by speculating on the continuing development of comparative literature a discipline particularly well suited to new modes of discourse both reflective and reflexive as illuminating as a two way mirror
