Hitting Pause Gail Taylor Rice, 2023-07-03 Pauses constitute a simple technique for enlivening and enhancing the effectiveness of lectures or indeed of any form of instruction whether a presentation or in an experiential setting This book presents the evidence and rationale for breaking up lectures into shorter segments by using pauses to focus attention reinforce key points and review learning It also provides 65 adaptable pause ideas to use at the opening of class mid way through or as closers Starting with brain science research on attention span and cognitive load Rice bases her book on two fundamental principles shorter segments of instruction are

better than longer ones and learners who actively participate in instruction learn better than those who don't. Pausing helps teachers apply these principles and create student engagement without requiring major changes in their lesson plans. With careful planning they can integrate pauses into learning sessions with ease and significantly reinforce student learning. They will also gain feedback on students' comprehension. Rice sets out the characteristics of good pauses, gives advice on how to plan them and how to introduce them to maximum effect. She provides compelling examples and concludes with a repertory of pauses readers can easily modify and apply to any discipline. This book contains a compendium of strategies that any teacher can fruitfully use to reinforce learning as well as a stepping stone to those seeking to transition to more active learning methods. It makes the case for using pauses, identifies the primary functions of pauses (focusing, refocusing, enhancing retention or closing off the learning experience), provides research evidence from cognitive science and educational psychology, provides practical guidance for creating quick active learning breaks, distinguishes between starting, middle and closing pauses, and includes descriptions with suggested applications of 65 pauses.

Chinese as a Second and Foreign Language Education Qiao Yu Cai, 2018-01-22. This book presents key issues in the teaching of Chinese as a second or foreign language (TCSL or TCFL). It investigates how multimedia can help to assist TCSL/TCFL and explores practical effects of multimedia-assisted teaching at secondary schools in the Philippines. It addresses the psychology of TCSL/TCFL and discusses various recurring foreign graduate students' concerns when learning academic Chinese in graduate institutes in Taiwan. It examines issues of educational assessment and testing, analyzing the validity of a self-made placement test for an immigrant Chinese program as well as the psychological characteristics of adult learners and their implications for immigrant Chinese curriculum design. As foreign learners of Chinese grow exponentially, this cutting-edge read conceptualizes the educational philosophy of TCSL/TCFL as a distinctive discipline.

The COST Manual of Laboratory Animal Care and Use Bryan Howard, Timo Nevalainen, Gemma Perretta, 2016-04-19. COST European Cooperation in the field of Scientific and Technical Research is an intergovernmental initiative in science and research intended to promote the coordination of nationally funded research in Europe.
